You are about to purchase a product that is not simple and may be difficult to understand.

What is this product?

Type

Aegon Short Dated High Yield Global Bond Fund is a sub-fund of Aegon Asset Management Investment Company (Ireland) plc.

Term

The term of the Fund is unlimited and therefore there is no maturity date. The Fund Manager / Manufacturer may decide to terminate the Fund unilaterally as set out in the Prospectus of the Funds. Situations that give rise to an automatic termination are not foreseen in the Funds Prospectus, but may be foreseen by laws and regulations applicable to the Fund.

Objective: to maximise total return (income plus capital).

Policy: invests predominantly in high yield (higher risk) bonds. The fund may also hold selected investment grade (lower risk) bonds and cash. Bonds will be issued by companies and governments worldwide and will have a maximum residual maturity of five and a half years.

The Fund is actively managed.

The Fund may also invest in derivatives (financial contracts whose value is linked to an underlying asset).

The Fund may invest up to 20% in emerging markets. In investment terms, this means those economies that are still developing. Within the limits set out above, the Fund has discretion in its choice of investments and is not restricted by market sector. It may also hold a limited range of other investments and it is not constrained by any benchmark or index.

The Fund may use investment techniques to manage risks and costs. These techniques include 'hedging' (using derivatives to reduce the risk associated with making investments in other currencies). Up to 20% of the Fund may not be 'hedged' i.e. the Fund is exposed to the risks of investing in another currency for this portion.

Comparator benchmark: Barclays Global High Yield Corporate 1-5 Year Ba/B Index GBP Hedged. Comparison against this index will allow investors to compare the Fund's performance against that of a representative but not identical universe of

the Fund's potential investments. Comparison against this index will also allow investors to judge the active nature of the Fund against performance of an index which could reflect the performance of equivalent passive funds

Other information: You can buy, sell or exchange the Fund's shares on any business day (see 'Key Information for Buying and Selling' in the Fund Supplement to the Prospectus for more information).

Note: the currency of this share class is different from the base currency of the Fund. We use investment techniques which aim to eliminate the impact of exchange rate changes between the share class currency and the currency of the Fund. Aegon Asset Management Investment Company (Ireland) plc operates two different methods of hedging share classes. Full details of these can be found in the Prospectus. Income the Fund receives will be reinvested and automatically reflected in the value of your shares.

Intended retail investor

The Fund will target retail and institutional investors seeking pooled exposure to the high yield global bond market and who are comfortable with a medium level of investment risk. Share prices will fluctuate and may fall in value. It is important to understand that the Fund should be viewed as a medium to long term investment. The Fund may not be appropriate for investors who plan to invest in the short term.

The Depositary of the Fund is Citibank Depositary Services Ireland Limited.

Further information about the Fund and copies of the Prospectus, Supplement, latest Annual and Semi-Annual Reports of the Company can be obtained free of charge from our website (www.aegonam.com) or by calling +353 1 622 4493. These documents are available in English.

The prices of shares will be published daily on our website (www.aegonam.com).

What are the risks and what could I get in return?

Risk Indicator

The risk indicator assumes you keep the product for 3 years.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this Fund as 2 out of 7 which is a low risk class. This rates the potential losses from future performance at a low level, and poor market conditions are very unlikely to impact performance.

This fund exposes investors to investment risks, including market, credit and liquidity risk. Please refer to the fund's prospectus document for a comprehensive list of applicable risks for this fund.

This product does not include any protection from future market performance so you could lose some or all of your investment.

Performance Scenarios

What you will get from this Fund depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted. The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product over the last 10 years. Markets could develop very differently in the future.

| Recommended holding period: | | 3 years | |
|-----------------------------|---|--------------------------|---------------------------|
| Example Investment: | | £10000 | |
| | | If you exit after 1 year | If you exit after 3 years |
| Scenarios | | | |
| Minimum | There is no minimum guaranteed return. You could lose some or all of your investment. | | |
| Stress | What you might get back after costs | £5890 | £7370 |
| | Average return each year | -41.10% | -9.67% |
| Unfavourable | What you might get back after costs | £9210 | £9560 |
| | Average return each year | -7.90% | -1.49% |
| Moderate | What you might get back after costs | £10250 | £10900 |
| | Average return each year | 2.50% | 2.91% |
| Favourable | What you might get back after costs | £11860 | £11690 |
| | Average return each year | 18.60% | 5.34% |

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

The stress scenario shows what you might get back in extreme market circumstances.

Unfavourable scenario: This type of scenario occurred for an investment between 2017 and 2020.

Moderate scenario: This type of scenario occurred for an investment between 2014 and 2017.

Favourable scenario: This type of scenario occurred for an investment between 2016 and 2019.

What happens if Aegon Asset Management Investment Company (Ireland) plc is unable to pay out?

As a Fund participant, you may suffer financial loss in case the Fund is unable to pay out. This financial loss is not covered by the Irish Investor Compensation Scheme.

What are the costs?

Costs over Time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the first year you would get back the amount that you invested (0% annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario
- 10,000.00 GBP is invested.

| | If you exit after 1 year | If you exit after 3 years |
|------------------------|--------------------------|---------------------------|
| Total costs | £81 | £258 |
| Annual cost impact (*) | 0.8% | 0.8% each year |

(*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 3.9% before costs and 3.1% after costs.

Composition of Costs

| One-off costs upon entry or exit | | If you exit after 1 year |
|---|--|--------------------------|
| Entry costs | We do not charge an entry fee. | £0 |
| Exit costs | We do not charge an exit fee for this product, but the person selling you the product may do so. | £0 |
| Ongoing costs taken each year | | |
| Management fees and other administrative or operating costs | 0.57% of the value of your investment per year. This is an estimate based on actual costs over the last year. | £57 |
| Transaction costs | 0.24% of the value of your investment per year. This is an estimate of the costs incurred when we buy and sell the underlying investments for the Fund. The actual amount will vary depending on how much we buy and sell. | £24 |
| Incidental costs taken under specific conditions | | |
| Performance fees (and carried interest) | There is no performance fee for this product. | £0 |

How long should I hold it and can I take money out early?

Recommended holding period: 3 years

Investors can subscribe and redeem daily. The Company may levy an initial charge of up to 5% of the Net Asset Value per Share in connection with the subscription of Class A, D, G, L and X Shares of the Fund. This fee will be retained for the benefit of the Global Distributor. There can also be a Repurchase Charge of up to 3% of the redemption amount on Classes A, D, G, L and X Shares classes. The Fund may suffer dilution (reduction in the value of the assets as a result of the costs incurred in dealing in its underlying investments and of any spread between the buying and the selling prices of such investments which is not reflected in the issue or redemption price paid by or to Shareholders). With a view to countering this (which, if it is significant, disadvantages existing or continuing Shareholders), the Manager may make an adjustment (Dilution Adjustment) to the Share price on a daily and quarterly basis

How can I complain?

Each shareholder/investor which is not satisfied with its experience as an investor in the Fund is entitled to bring a complaint in accordance with the applicable complaints handling policy. As an investor, you are entitled to file a complaint free of charge. Any such complaint must be handled by Aegon Investment Management B.V. or its delegates promptly and effectively. Aegon Asset Management's complaints management policy is available upon request. Irish investors may also have the right to complain to the Irish Financial Services and Pensions Ombudsman. Investors may also raise a complaint through the EU Online Dispute Resolution (ODR) portal www.ec.europa.eu/consumers/odr/ if the complaint relates to Shares that were subscribed by electronic means, including via email. Making a complaint will not prejudice your rights to commence legal proceedings. Our summary of investor rights and collective redress can be found on our website: <https://www.aegonam.com/en/contact/> under 'Complaints'.

AXA Framlington Health Fund

Unit class : AXA Framlington Health Fund Z Accumulation GBP (ISIN: GB00B6WZJX05)
This Fund is managed by AXA Investment Managers UK Limited, part of the AXA IM Group

Objective and Investment Policy

Investment Objective

The aim of this Fund is to provide long-term capital growth over a period of 5 years or more.

Investment Policy

The Fund invests in shares of listed healthcare companies including producers of pharmaceuticals, biotechnology firms, medical device and instrument manufacturers, distributors of healthcare products, care providers and managers and other healthcare services companies, which the fund manager believes will provide above-average returns. The Fund invests in companies of any size which can be based anywhere in the world albeit the Fund tends to be biased towards the US, as this is where the majority of healthcare related companies are based. The fund manager selects shares based upon analysis of a company's financial status, quality of its management, expected profitability and prospects for growth.

The fund manager has full discretion to select investments for the Fund in line with the above investment policy and in doing so may take into consideration the MSCI World Healthcare index. The MSCI World Healthcare index is designed to measure the performance of large and mid-cap segments across a number of developed markets as selected by the index provider. This index best represents the types of companies in which the Fund predominantly invests.

This Fund is actively managed in reference to the MSCI World Healthcare index, which may be used by investors to compare the Fund's performance.

Income

Income from investments in the Fund will be rolled up into the value of your unit if you hold accumulation units.

Fund Currency

The reference currency of the Fund is Sterling.

Investment Horizon

This Fund may not be suitable for investors who plan to withdraw their contribution within five years.

Processing of subscription and redemption orders

Your orders to buy, sell or transfer units in the Fund must be received by the Administrator by 12 noon on any working day, to receive that day's Fund price. Please note that if your order is placed by an intermediary or Financial Adviser they may require extra processing time.

The Net Asset Value of this Fund is calculated on a daily basis.

Minimum initial investment: £100,000

Minimum subsequent investment: £5,000

Risk and Reward Profile

The risk category is calculated using historical performance data and may not be a reliable indicator of the Fund's future risk profile.

The risk category shown is not guaranteed and may shift over time.

The lowest category does not mean risk free.

Why is this Fund in this category?

The capital of the Fund is not guaranteed. The Fund is invested in financial markets and uses techniques and instruments which may be subject to sudden and significant variation, which may result in substantial gains or losses.

Additional Risks (risks materially relevant to the fund which are not adequately captured by the indicator)

Counterparty Risk: failure by any counterparty to a transaction (e.g. derivatives and securities lending) with the Fund to meet its obligations may adversely affect the value of the Fund. The Fund may receive assets from the counterparty to protect against any such adverse effect but there is a risk that the value of such assets at the time of the failure would be insufficient to cover the loss to the Fund.

Single Sector Risk: as this Fund is invested in a single sector, the Fund's value will be more closely aligned with the performance of that sector and it may be subject to greater fluctuations in value than more diversified funds.

Currency Risk: the Fund holds investments denominated in currencies other than the base currency of the Fund. As a result, exchange rate movements may cause the value of investments (and any income received from them) to fall or rise affecting the Fund's value.

Further explanation of the risks associated with an investment in this Fund can be found in the prospectus.

AXA Framlington Health Fund

Charges

The charges you pay are used to pay the cost of running the fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest

| | |
|--------------|------|
| Entry charge | none |
| Exit charge | none |

This is the maximum that might be taken out of your money before it is invested.

Charges taken from the fund over a year

| | |
|-----------------|-------|
| Ongoing charges | 0.82% |
|-----------------|-------|

Charges taken from the fund under certain specific conditions

| | |
|-----------------|------|
| Performance fee | none |
|-----------------|------|

The entry and exit charges shown are maximum figures. In some cases, you might pay less - you can find this out from your Financial Adviser.

The ongoing charges figure is based on expenses for the previous twelve month period. This figure may vary from year to year. It excludes:

- Performance fees
- Portfolio transaction costs, except in the case of an entry/exit charge paid by the Fund when buying or selling units in another collective investment undertaking.

For more information about charges, please refer to AXA IM website: <https://www.axa-im.co.uk/important-information/fund-charges-and-costs> as well as the Fees and Expenses section of the prospectus which is available at <https://funds.axa-im.com>.

Past performance

Past performance is not a reliable indicator of future results.

Past performance is shown after the deduction of ongoing charges. Any entry/exit fees are excluded from the calculation.

The Fund was launched on 27/02/1987 and the unit in 2012.

Past performance has been calculated in Sterling and is expressed as a percentage change of the Fund's Net Asset Value at each year end.

Prior to 07/08/2019, the comparator benchmark was the 100% MSCI World Healthcare Total Return Net (NDWUHC).

As of 07/08/2019, the comparator benchmark of the Fund is the MSCI World Healthcare index.

BlackRock Continental European Fund

Class D Accumulating GBP

ISIN: GB00B4VY9893

Manager: BlackRock Fund Managers Limited

Objectives and Investment Policy

- ▶ The Fund aims to provide a return on your investment (generated through an increase in the value of the assets held by the Fund) over the long term (5 years or more).
- ▶ The Fund invests at least 70% of its total assets in the equity securities (e.g. shares) of companies incorporated, or listed on a stock exchange, in Europe, excluding the United Kingdom.
- ▶ The companies in which the Fund invests will typically be larger companies.
- ▶ The investment adviser (IA) may use derivatives (i.e. investments the prices of which are based on one or more underlying assets) to reduce risk within the Fund's portfolio, reduce investment costs and generate additional income.
- ▶ The Fund is actively managed and the IA has discretion to select the Fund's investments. In doing so, the IA will refer to the FTSE World Europe ex-UK Index (the "Index") when constructing the Fund's portfolio, and also for risk management purposes to ensure that the active risk (i.e. degree of deviation from the index) taken by the Fund remains appropriate given the Fund's investment objective and policy. The IA is not bound by the components or weighting of the Index when selecting investments. The IA may also use its discretion to invest in securities not included in the Index in order to take advantage of specific investment opportunities. However, the geographical scope of the investment objective and policy may have the effect of limiting the extent to which the portfolio holdings will deviate from the Index. The Index should be used by unitholders to compare the performance of the Fund.
- ▶ Recommendation: This Fund may not be appropriate for short-term investment.
- ▶ Your units will be accumulating units (i.e. dividend income will be included in their value).
- ▶ Your units will be denominated in Sterling, the Fund's base currency.
- ▶ You can buy and sell your units daily. The minimum initial investment for this unit class is £100,000.

For more information on the Fund, share/unit classes, risks and charges, please see the Fund's prospectus, available on the product pages at www.blackrock.com

Risk and Reward Profile

- ▶ This indicator is based on historical data and may not be a reliable indication of the future risk profile of the Fund.
- ▶ The risk category shown is not guaranteed and may change over time.
- ▶ The lowest category does not mean risk free.
- ▶ The Fund is rated six due to the nature of its investments which include the risks listed below. These factors may impact the value of the Fund's investments or expose the Fund to losses.

- The value of equities and equity-related securities can be affected by daily stock market movements. Other influential factors include political, economic news, company earnings and significant corporate events.
- ▶ Particular risks not adequately captured by the risk indicator include:
 - Counterparty Risk: The insolvency of any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments, may expose the Fund to financial loss.

Charges

The charges are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

The entry and exit charges shown are maximum figures. In some cases you might pay less. Please refer to your financial advisor or the distributor for the actual entry and exit charges.

*Subject to a charge of up to 2% paid into the Fund where the Manager suspects excessive trading by an investor.

The ongoing charges figure is based on expenses for the twelve month period ending 31 December 2022. This figure may vary from year to year. It excludes portfolio trade-related costs, except costs paid to the custodian and any entry/exit charge paid to an underlying collective investment scheme (if any).

** To the extent the Fund undertakes securities lending to reduce costs, the Fund will receive 62.5% of the associated revenue generated and the remaining 37.5% will be received by BlackRock as the securities lending agent. As securities lending revenue sharing does not increase the costs of running the Fund, this has been excluded from the ongoing charges.

| One-off charges taken before or after you invest | |
|--|---------|
| Entry Charge | None |
| Exit Charge | None* |
| This is the maximum that might be taken out of your money before it is invested or before proceeds of your investments are paid out. | |

Key Investor Information

Fidelity Cash Fund

a sub-fund of Fidelity Investment Funds

Fidelity Cash Fund W Accumulation Shares
(ISIN:GB00BD1RHT82)

This fund is managed by FIL Investment Services (UK) Limited

Objectives and Investment Policy

The fund aims to maintain the value of your investment and pay you an income.

The fund will invest at least 70% in a diversified range of sterling denominated money market instruments and other short-term investments (e.g. bonds).

Money market instruments are investments usually issued by banks or governments that are a short-term loan to the issuer by the buyer. The buyer receives interest and the return of the original amount at the end of a certain period.

The remainder will be invested in other cash type investments.

The fund is actively managed without reference to a benchmark.

The fund has full discretion in its choices of investments within its objectives and policies.

Income earned by the fund is paid into the fund and reflected by an increase in the value of each share.

Shares can usually be bought and sold each business day of the fund.

The fund is a Variable Net Asset Value Money Market Fund (i.e. the price can fluctuate) and operates as a Short-Term Money Market Fund.

Risk and Reward Profile

Historical data may not be a reliable indication for the future.

The risk category shown is not guaranteed and may change over time.

The lowest category does not mean a "risk free" investment.

The risk and reward profile is classified by the level of historical fluctuation of the Net Asset Values of the share class, and within this classification, categories 1-2 indicate a low level of historical fluctuations, 3-5 a medium level and 6-7 a high level.

The value of your investment may fall as well as rise and you may get back less than you originally invested.

The fund may invest in instruments denominated in currencies other than the fund base currency. Changes in currency exchange rates can therefore affect the value of your investment.

This Fund is categorised in risk class 1 because, in accordance with the investment policy, the value of the investments may scarcely fluctuate. Consequently, both the expected return and the potential risk of loss may be very slight. There is a risk that the issuers of bonds may not be able to repay the money they have borrowed or make interest payments. While we seek to mitigate this, the fund may be exposed to the risk of financial loss if it invests into an instrument issued by an entity that subsequently defaults on its borrowings. Losses may also be realised if an entity that the fund is exposed to ceases to make interest payments over a period of time or indefinitely. Bond prices have an inverse relationship with interest rates such that when interest rates rise, bonds may fall in value. Rising interest rates may cause the value of your investment to fall.

Investment in a Money Market Fund is different from an investment in deposits, in particular, the principal invested in a Money Market Fund may fluctuate and the risk of loss of the principal is to be borne by the investor.

The fund is not a guaranteed investment. It does not rely on external support for guaranteeing the liquidity of the fund or stabilising the net asset value of shares in the fund.

Issuer or counterparty default could cause losses.

Charges for this fund

The charges you pay are used to pay the costs of running the fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

| One-off charges taken before or after you invest | |
|---|-------|
| Entry charge | N/A |
| Exit charge | N/A |
| The entry and exit charges shown are maximum figures. In some cases you might pay less - you can find this out from your financial adviser / distributor. | |
| Charges taken from the fund over a year | |
| Ongoing charges | 0.15% |
| Charges taken from the fund under certain specific conditions | |
| Performance fee | N/A |

This is the maximum that might be taken out of your money before it is invested or before the proceeds of your investment are paid out.*

The ongoing charges figure is based on expenses for the year ending 28 February 2022. This figure may vary from year to year. It excludes:

- performance fees (where applicable);
- portfolio transaction costs, except in the case of an entry/exit charge paid by the fund when buying or selling units in another collective investment undertaking.

For more information about charges, including the possibility that swing pricing may apply, please consult the most recent Prospectus.

Past Performance

Past performance is not a guide to future performance results.

If any, the past performance shown takes into account the ongoing charges with exception of any applicable entry/exit charges.

The Fund and the Class were launched on 21 October 2016.

Past performance has been calculated in GBP.

If applicable, events in the fund's life which may have affected the performance history are highlighted as an '*' in the chart, which may include changes to the fund's objective and details of such events can be found on our website or by requesting it from your appointed representative or your usual Fidelity contact. If applicable, the Investment Objective section shall refer to a benchmark and information on previous benchmarks may be found in the Annual Report and Accounts. Performance before the launch date relates to the Fidelity Cash Fund unit trust which merged into the fund.

Intended retail investor

This product may appeal to investors with a basic knowledge of and no or limited experience of investing in funds; who plan to hold their investment for a recommended holding period of at least 4 years; who seek capital growth over the recommended holding period; and who understand the risk of losing some or all of the capital invested.

What are the risks and what could I get in return?

Risk Indicator

The risk indicator assumes you keep the product for 4 years.
The actual risk can vary significantly if you cash in at the early stage and you may get back less.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as 5 out of 7, which is a medium-high risk class.

This rates the potential losses from future performance at a medium-high level, and poor market conditions will likely impact the capacity to pay you.

Be aware of currency risk. You will receive payments in a different currency, so the final return you will get depend on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.

Additional risks: emerging markets.

This product does not include any protection from future market performance so you could lose some or all of your investment.

If FIL Investment Management (Luxembourg) S.A. is not able to pay you what is owed, you could lose your entire investment.

Performance scenarios

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product and a suitable benchmark over the last 10 years. Markets could develop very differently in the future.

| Recommended holding period: 4 years Example investment : GBP 10,000 | | If you exit after 1 year | If you exit after 4 years |
|--|---|--------------------------|---------------------------|
| Scenarios | | | |
| Minimum | There is no minimum guaranteed return. You could lose some or all of your investment. | | |
| Stress | What you might get back after costs | 3,410 GBP | 3,050 GBP |
| | Average return each year | -65.9% | -25.7% |
| Unfavourable | What you might get back after costs | 8,650 GBP | 9,640 GBP |
| | Average return each year | -13.5% | -0.9% |
| Moderate | What you might get back after costs | 12,250 GBP | 24,470 GBP |
| | Average return each year | 22.5% | 25.1% |
| Favourable | What you might get back after costs | 16,830 GBP | 27,540 GBP |
| | Average return each year | 68.3% | 28.8% |

The stress scenario shows what you might get back in extreme market circumstances.

The unfavourable scenario occurred for an investment between 12/2021 and 04/2023.

The moderate scenario occurred for an investment between 06/2013 and 06/2017.

The favourable scenario occurred for an investment between 01/2016 and 01/2020.

What happens if FIL Investment Management (Luxembourg) S.A. is unable to pay out?

The assets and liabilities of this product are segregated from those of FIL Investment Management (Luxembourg) S.A. There is no cross-liability between these entities, and the product would not be liable if FIL Investment Management (Luxembourg) S.A. or any delegated service provider were to fail or default.

Shares of this product are traded on a stock market and settlement of such transactions are not affected by the position of FIL Investment Management (Luxembourg) S.A.

This product does not participate in an investor compensation scheme.

What are the costs?

The person selling you or advising you about this product may charge you other costs. If so, this person will provide you with information about these costs, and show you the impact that all costs will have on your investment over time.

Costs over Time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the first year you would get back the amount that you invested (0% annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario.
- GBP 10,000 is invested.

| | If you exit after 1 year | If you exit after 4 years |
|-------------------------------|--------------------------|---------------------------|
| Total costs | 164 GBP | 1,181 GBP |
| Annual cost impact (*) | 1.6% | 2.0% each year |

(*)This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 27.1% before costs and 25.1% after costs.

Composition of Costs

| One-off costs upon entry or exit | | If you exit after 1 year |
|--|---|--------------------------|
| Entry costs | We do not charge an entry fee. | 0 GBP |
| Exit costs | We do not charge an exit fee for this product. | 0 GBP |
| Ongoing costs taken each year | | |
| Management fees and other administrative or operating costs | 1.03% of the value of your investment per year. This is an estimate based on actual costs over the last year. | 105 GBP |
| Transaction costs | 0.58% of the value of your investment per year. This is an estimate of the costs incurred when we buy and sell the underlying investments for the product. The actual amount will vary depending on how much we buy and sell. | 59 GBP |
| Incidental costs taken under specific conditions | | |
| Performance fees | There is no performance fee for this product. | 0 GBP |

How long should I hold it and can I take money out early?

Recommended holding period: 4 years

The recommended holding period is based on our assessment of the risk and reward characteristics and costs of the product.

Order Processing: Requests to buy, switch or sell fund shares that are received and accepted by the Management Company by 4:00 PM CET (3:00 PM UK time) on any Valuation Day are ordinarily processed at the NAV for that Valuation Day. Settlement occurs within 3 business days after receipt of written instructions, and in case of redemptions no later than 5.

Fidelity UK Smaller Companies Fund

a sub-fund of Fidelity Investment Funds

Fidelity UK Smaller Companies Fund W Accumulation Shares
(ISIN:GB00B7VNMB18)

This fund is managed by FIL Investment Services (UK) Limited

Objectives and Investment Policy

The fund aims to increase the value of your investment over a period of 5 years or more.

The fund will invest at least 60% in smaller sized UK companies (companies which form the smallest 10% of UK listed companies by market capitalisation).

The companies will be either incorporated, domiciled, or have significant business activities in the region.

The fund will invest in companies believed to be undervalued with recovery potential not fully recognised by the market.

The fund may also invest a proportion of its assets in global companies listed in the UK.

The remainder will be invested in companies outside the UK and in other investment types such as cash and derivatives.

Derivatives are investments whose value is linked to another investment, or to the performance of a stock exchange or to some other variable factor, such as interest rates and used to reduce risk or transaction costs and/or to generate extra income or further increase the value of your investment.

The fund may also use derivatives with the aim of achieving the investment objective.

The fund is actively managed without reference to a benchmark.

The fund has full discretion in its choices of investments within its objectives and policies.

Income earned by the fund is paid into the fund and reflected by an increase in the value of each share.

Shares can usually be bought and sold each business day of the fund.

Risk and Reward Profile

Historical data may not be a reliable indication for the future.

The risk category shown is not guaranteed and may change over time.

The lowest category does not mean a "risk free" investment.

The risk and reward profile is classified by the level of historical fluctuation of the Net Asset Values of the share class, and within this classification, categories 1-2 indicate a low level of historical fluctuations, 3-5 a medium level and 6-7 a high level.

The value of your investment may fall as well as rise and you may get back less than you originally invested.

The fund may invest in instruments denominated in currencies other than the fund base currency. Changes in currency exchange rates can therefore affect the value of your investment.

This Fund is categorised in risk class 6 because, in accordance with the investment policy, the value of the investments may fluctuate considerably. Consequently, both the expected return and the potential risk of loss may be high. The use of derivatives may result in "leverage" by which we mean a level of exposure which could expose the fund to the potential of greater gains or losses than would otherwise be the case.

Liquidity is a measure of how easily an investment can be converted into cash. Under certain market conditions assets may be more difficult to value or sell at a desired price. This could affect the fund's ability to meet redemptions in a timely manner.

Additional risks: liquidity.

Charges for this fund

The charges you pay are used to pay the costs of running the fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

| One-off charges taken before or after you invest | |
|---|-------|
| Entry charge | N/A |
| Exit charge | N/A |
| The entry and exit charges shown are maximum figures. In some cases you might pay less - you can find this out from your financial adviser / distributor. | |
| Charges taken from the fund over a year | |
| Ongoing charges | 0.92% |
| Charges taken from the fund under certain specific conditions | |
| Performance fee | N/A |

This is the maximum that might be taken out of your money before it is invested or before the proceeds of your investment are paid out.

The ongoing charges figure is based on expenses for the year ending 28 February 2022. This figure may vary from year to year. It excludes:

- performance fees (where applicable);
- portfolio transaction costs, except in the case of an entry/exit charge paid by the fund when buying or selling units in another collective investment undertaking.

For more information about charges, including the possibility that swing pricing may apply, please consult the most recent Prospectus.

Past Performance

Past performance is not a guide to future performance results.

If any, the past performance shown takes into account the ongoing charges with exception of any applicable entry/exit charges.

The fund was launched on 10 February 2011. This class was launched on 15 October 2012.

Past performance has been calculated in GBP.

If applicable, events in the fund's life which may have affected the performance history are highlighted as an "**"; in the chart, which may include changes to the fund's objective and details of such events can be found on our website or by requesting it from your appointed representative or your usual Fidelity contact. If applicable, the Objectives and Investment Policy section shall refer to a benchmark and information on previous benchmarks may be found in the annual report and accounts.

First Sentier Global Property Securities Fund Class B (Accumulation) GBP

a sub-fund of First Sentier Investors ICVC (the Company)

ISIN GB00B1F76N79

First Sentier Investors (UK) Funds Limited, the authorised corporate director of the Company

Key Investor Information

This document provides you with key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

Objectives and investment policy

Objective: The Fund aims to achieve an investment return from income and capital growth over the long term (at least five years).

Policy: The Fund invests at least 70% in shares of companies that are involved in property around the world and are listed on exchanges worldwide.

The Fund does not invest directly in property.

The Fund may invest up to 10% in other funds.

The Fund will only use derivatives to reduce risk or to manage the Fund more efficiently in limited cases.

Strategy: The Manager's strategy is to focus on quality companies that it would expect to outperform over the long-term (at least 5 years) especially in down markets. The Fund strategy is to invest in real estate investment trusts or companies that own, develop or manage real property across different geographic markets.

Benchmark: The Fund's performance is compared against the value of the FTSE EPRA Nareit Developed Index and the Fund is included in the Investment Association's Property Other Sector.

The Fund's manager may use its discretion when deciding which investments should be held by the Fund.

The Fund is actively managed; investment of the Fund's assets is not constrained by the benchmark composition or sector requirements and the Fund's manager has discretion within the Fund's investment policy to invest in assets without regard to the benchmark.

Recommendation: this Fund may not be appropriate for investors who plan to withdraw their money within five years.

The Fund will not pay any income out; instead any income will be reflected in the value of your shares.

You can buy and sell shares in the Fund on any business day. As long as we receive your instruction before 12 noon (UK time), shares will be bought and sold at that day's price.

Risk and reward profile

- The synthetic risk reward indicator (the SRRRI) rating is not a measure of the risk of you losing the entire value of your investment but describes how much the value of the share class has gone up and down in the past. Where a share class has not yet launched, the SRRRI is calculated using representative data.
- The SRRRI rating is based on historical data which may not be a reliable indication of the future risks and rewards of the share class.
- We cannot guarantee that the rating of the share class will remain the same; it may change over time.
- Even the lowest rating 1 does not mean a risk free investment.
- On a scale of 1 (less risky) to 7 (more risky), this share class has a rating of 6 due to its past performance (or representative data) and the nature of its investments. Categories 1-2 indicate a low level of historical fluctuations, 3-5 a medium level, and 6-7 a high level.
- Risk is taken in order to make a higher potential return; the more risk a fund takes, the higher the potential return but the greater the risk of loss.

- The value of the Fund and its return is not guaranteed and may fall as well as rise. You may get back significantly less than you originally invested. Material risks not adequately captured by the SRRRI:
 - **Emerging market risk:** Emerging markets tend to be more sensitive to economic and political conditions than developed markets. Other factors include greater liquidity risk, restrictions on investment or transfer of assets, failed/delayed settlement and difficulties valuing securities.
 - **Property securities risk:** the Fund invests in the shares of companies that are involved in property (such as real estate investment trusts) rather than in property itself. The value of these investments may fluctuate more than the underlying property assets.
 - **Single sector risk:** investing in a single economic sector may be riskier than investing in a number of different sectors. Investing in a larger number of sectors helps to spread risk.
 - **Currency risk:** the Fund invests in assets which are denominated in other currencies; changes in exchange rates will affect the value of the Fund and could create losses. Currency control decisions made by governments could affect the value of the Fund's investments and could cause the Fund to defer or suspend redemptions of its shares.
- For further information on risks, please refer to the Risk Factors section in the Company's prospectus.

Charges for this Fund

The charges are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest

| | |

| Ongoing charge | 0.84% |
|----------------|-------|

Charges taken from the fund under certain specific conditions

| | |
|-----------------|-----|
| Performance fee | N/A |
|-----------------|-----|

The entry and exit charges shown are the maximum you will need to pay. In some cases you might pay less - you can find out the actual entry and exit charges from your financial adviser.

The ongoing charges figure shown here is an estimate of the charges and may vary from year to year. An estimate is being used following our periodic reassessment with effect from 01 December 2022. The figure excludes portfolio transaction costs which are paid from assets of the Fund and performance fees, if any. The next Company annual report for the financial year will include details on the exact charges made.

There are fees for switching between sub-funds. The fee for switching into the Fund is 0.5%.

The fees and expenses are charged against the capital of the Fund. Deducting expenses from capital reduces the potential for capital growth.

Further information can be found in the Buying, Selling and Switching Shares section of the Company's prospectus.

American Index Fund

a sub-fund of HSBC Index Tracker Investment Funds, (the "OEIC");
managed by HSBC Global Asset Management (UK) Limited

Class: Accumulation C
ISIN: GB00B80QG615

Explanations of terms shown within the objectives and policy in bold, can be found within the glossary on our website: <http://www.assetmanagement.hsbc.com>.

Objectives and Investment Policy

- The Fund aims to track the performance of the S&P 500 Index (the "Index") before the deduction of charges and tax.
- The Index is made up of the 500 largest stock market listed companies in the United States of America, as defined by the Index provider.
- The Fund will invest directly in shares (**equities**) of all of the companies that make up the Index and in the same or very similar proportions in which they are included in the Index.
- However, there may be circumstances when it is not possible or practical for the Fund to invest in shares of all the companies of the Index. The Fund may not invest in all the companies of the Index to manage transaction costs or to reflect market conditions, regulations or HSBC's banned weapons policy.
- The Fund may hold cash and other funds, including funds managed by the **HSBC Group**, to manage day-to-day cash flow requirements.
- The anticipated **tracking error** for the Fund is expected to be up to 0.10%.

Use of derivatives

- The Fund may invest in different types of **derivatives** for **efficient portfolio management**, including **hedging**. In particular the Fund may use **derivatives** to help it manage cash flows and dividend payments with the aim of generating **returns** that are consistent with the Index. The use of **derivatives** will be consistent with the risk profile of the Fund.
- The Fund may enter into securities lending transactions for up to 29% of its assets. However, this is not expected to exceed 25%.
- Income is reinvested.
- You may sell your investment on any business day by contacting the administrator before the dealing deadline at 12pm.
- Recommendation: this Fund may not be appropriate for investors who plan to withdraw their money within a period of 5 years.

Risk and Reward Profile

The risk and reward indicator is based on historical data and may not be a reliable indication of the future risk profile of the Fund.

The risk and reward category shown is not guaranteed to remain unchanged and may shift over time. The lowest category does not mean a risk-free investment.

Why is this Fund in this specific category?

This Fund is classified in category 5 because its price or simulated data has shown medium to high fluctuations historically.

Material risks not fully captured by the Risk and Reward Indicator:

- **Counterparty Risk** The possibility that the counterparty to a transaction may be unwilling or unable to meet its obligations.
- **Derivatives Risk** Derivatives can behave unexpectedly. The pricing and volatility of many derivatives may diverge from strictly

reflecting the pricing or volatility of their underlying reference(s), instrument or asset.

- **Exchange Rate Risk** Changes in currency exchange rates could reduce or increase investment gains or investment losses, in some cases significantly.
- **Index Tracking Risk** To the extent that the Fund seeks to replicate index performance by holding individual securities, there is no guarantee that its composition or performance will exactly match that of the target index at any given time ("tracking error").
- **Investment Leverage Risk** Investment Leverage occurs when the economic exposure is greater than the amount invested, such as when derivatives are used. A Fund that employs leverage may experience greater gains and/or losses due to the amplification effect from a movement in the price of the reference source.
- **Liquidity Risk** Liquidity is a measure of how easily the Fund's holdings can be quickly converted to cash. The value of the Fund's holdings may be significantly impacted by liquidity risk during adverse market conditions.
- **Operational Risk** Operational errors may affect transactions, valuation, accounting, financial reporting and other processes relating to the Fund.

Charges

The charges you pay are used to pay the running costs of the Fund, including the marketing and distribution costs. These charges reduce the potential growth of the investment.

One-off charges taken before or after you invest

| | |

- The entry and exit charges shown are the maximum that may be charged. In some cases you may pay less. You can obtain the actual charges from your financial adviser.
- A conversion charge may be payable.
- The ongoing charges figure is based on last year's expenses for the year ending 15/11/2022. Charges may vary from year to year.

Further information on Charges can be found in the "Fees and Expenses" section of the Fund's Prospectus.

Past Performance

- Past performance is not a guide to future performance; the value of your investment and any income from it can go down as well as up.
- Performance returns are based on the net asset value with distributable income reinvested. Past performance takes account of all ongoing charges but not entry, exit or conversion charges.
- The past performance of this share class is calculated in GBP.

FTSE 100 Index Fund

a sub-fund of HSBC Index Tracker Investment Funds, (the "OEIC");
managed by HSBC Global Asset Management (UK) Limited

Class: Accumulation C
ISIN: GB00B80QFR50

Explanations of terms shown within the objectives and policy in bold, can be found within the glossary on our website: <http://www.assetmanagement.hsbc.com>.

Objectives and Investment Policy

- The Fund aims to provide **growth** over the long term, which is a period of 5 years or more, by tracking the performance of the FTSE 100 Index (the "Index").
 - The Index is made up of the largest stock market listed companies in the United Kingdom, as defined by the Index provider.
 - The Fund will invest directly in shares (**equities**) of all of the companies that make up the Index and in the same or very similar proportions in which they are included in the Index.
 - However, there may be circumstances when it is not possible or practical for the Fund to invest in shares of all the companies of the Index. The Fund may not invest in all the companies of the Index to manage transaction costs or to reflect market conditions, regulations or HSBC's banned weapons policy.
 - The Fund may hold cash and other funds, including funds managed by the **HSBC Group**, to manage day-to-day cash flow requirements.
 - The anticipated **tracking error** for the Fund is expected to be up to 0.10%.
- Use of derivatives**
- The Fund may invest in different types of **derivatives** for **efficient portfolio management**, including **hedging**. In particular the Fund may use **derivatives** to help it manage cash flows and dividend payments with the aim of generating **returns** that are consistent with the Index. The use of **derivatives** will be consistent with the risk profile of the Fund.
 - Income is reinvested.
 - You may sell your investment on any business day by contacting the administrator before the dealing deadline at 12pm.
 - Recommendation: this Fund may not be appropriate for investors who plan to withdraw their money within a period of 5 years.

Risk and Reward Profile

The risk and reward indicator is based on historical data and may not be a reliable indication of the future risk profile of the Fund.

The risk and reward category shown is not guaranteed to remain unchanged and may shift over time. The lowest category does not mean a risk-free investment.

Why is this Fund in this specific category?

This Fund is classified in category 6 because its price or simulated data has shown high fluctuations historically.

Material risks not fully captured by the Risk and Reward Indicator:

- **Counterparty Risk** The possibility that the counterparty to a transaction may be unwilling or unable to meet its obligations.
- **Derivatives Risk** Derivatives can behave unexpectedly. The pricing and volatility of many derivatives may diverge from strictly

reflecting the pricing or volatility of their underlying reference(s), instrument or asset.

- **Exchange Rate Risk** Changes in currency exchange rates could reduce or increase investment gains or investment losses, in some cases significantly.
- **Index Tracking Risk** To the extent that the Fund seeks to replicate index performance by holding individual securities, there is no guarantee that its composition or performance will exactly match that of the target index at any given time ("tracking error").
- **Investment Leverage Risk** Investment Leverage occurs when the economic exposure is greater than the amount invested, such as when derivatives are used. A Fund that employs leverage may experience greater gains and/or losses due to the amplification effect from a movement in the price of the reference source.
- **Liquidity Risk** Liquidity is a measure of how easily the Fund's holdings can be quickly converted to cash. The value of the Fund's holdings may be significantly impacted by liquidity risk during adverse market conditions.
- **Operational Risk** Operational errors may affect transactions, valuation, accounting, financial reporting and other processes relating to the Fund.

Charges

The charges you pay are used to pay the running costs of the Fund, including the marketing and distribution costs. These charges reduce the potential growth of the investment.

One-off charges taken before or after you invest

| | |
|--------------|-------|
| Entry charge | 0.00% |
| Exit charge | 0.00% |

This is the maximum that might be taken out of your money before it is invested or before the proceeds of your investment are paid out.

Charges taken from the Fund over a year

| | |
|----------------|-------|
| Ongoing charge | 0.09% |
|----------------|-------|

Charges taken from the Fund under certain specific conditions

US Multi-Factor Equity Fund

a sub-fund of HSBC Universal Investment Funds, (the "OEIC");
managed by HSBC Global Asset Management (UK) Limited

Class: Institutional A
Accumulation
ISIN: GB00B19DCX31

Explanations of terms shown within the objectives and policy in bold, can be found within the glossary on our website: <http://www.assetmanagement.hsbc.com>.

Objectives and Investment Policy

- The Fund aims to provide **growth** in the long term, which is a period of five years or more.
- To achieve its objective the Fund will invest at least 80% of its value in shares (**equities**) of US companies. US companies are those that are based in the US, or earn at least 80% of their revenue from the US.
- The Fund may invest up to 20% of its value in other assets, such as shares of non-US companies, assets equivalent to shares of companies and cash.
- The Fund may also invest up to 10% of its value in other funds, which may be managed by the **HSBC Group**.
- The investment manager identifies potential shares of companies from the S&P 500 Index together with potential shares of companies that are not part of the Index and ranks them from the least attractive to most attractive based upon certain factors, such as value, quality and size. The manager's investment approach then aims to maximise exposure to the highest ranked shares whilst maintaining a portfolio diversified by companies and sectors to manage risk.

Use of Benchmarks

- The Fund is managed with reference to the S&P 500 Index. The sector and stock constraints, relative to the S&P 500 Index, within the investment strategy means the Fund **returns** are more likely to be closer to the **returns** of the S&P 500 Index

than if there were no limits on the level of risk the Fund may take.

- The S&P 500 Index is also considered as part of our investment risk monitoring process, to check that the overall level of risk taken by the fund manager is not inconsistent with the US **equities** market.
- The performance of the Fund is therefore shown against the performance of the S&P 500 Index.

Use of Derivatives

- The Fund may invest in different types of **derivatives** for **efficient portfolio management** purposes, including **hedging**. The Fund does not currently use **derivatives** to reduce the risk of movements in the rate of exchange between Sterling and other currencies in which the Fund's assets may be held. The Fund does not intend to use **derivatives** extensively and their use will be consistent with the risk profile of the Fund.
- The Fund may enter into securities lending transactions for up to 29% of its assets. However, this is not expected to exceed 25%.
- Income is reinvested.
- You may sell your investment on any business day by contacting the administrator before the dealing deadline at 12pm.
- Recommendation: this Fund may not be appropriate for investors who plan to withdraw their money within a period of 5 years.

A fund of Invesco Far Eastern Investment Series (the "Company")

Z Accumulation share class (ISIN: GB00B8N44Q86) (the "Share Class")

The Fund is managed by Invesco Fund Managers Limited, part of the Invesco Group.

Key Investor Information

This document provides you with key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

Objectives and Investment Policy

- The objective of the Fund is to achieve long-term (5 years plus) capital growth.
- The Fund invests at least 80% of its assets in shares of companies incorporated, domiciled or carrying out the main part of their economic activity in Asia and Australasia, excluding Japan.
- The Fund may use derivatives (complex instruments) to manage the Fund more efficiently, with the aim of reducing risk, reducing costs and/or generating additional capital or income.
- The Fund has an active investment approach based on stock selection driven by the fund manager's assessment of valuation. The Fund is not constrained by a benchmark and has a flexible approach with no inbuilt bias to country, sector or company size.
- The reference to (UK) in the Fund's name only relates to the Fund's domicile and is unrelated to the Fund's objective and investment policy.
- You can buy, sell and switch shares in the Fund on any Dealing Day (as defined in the Prospectus).
- Any income from your investment will be reinvested.
- Recommendation: The Fund may not be appropriate if you plan to withdraw your money within 5 years.

Risk and Reward Profile

- The Share Class is in risk category 6 due to the rises and falls of its price or simulated data in the past.
- As the Share Class' risk category has been calculated using historical data, it may not be a reliable indication of the Share Class' future risk profile.
- The risk category may change in the future and is not guaranteed.
- The lowest category does not mean a risk free investment.

Other Risks

- The value of investments and any income will fluctuate (this may partly be the result of exchange rate fluctuations) and you may not get back the full amount invested. Over time, inflation may erode the value of investments.
- The Fund invests in emerging and developing markets, where there is potential for a decrease in market liquidity, which may mean that it is not easy to buy or sell securities. There may also be difficulties in dealing and settlement, and custody problems could arise.
- The Fund may use Stock Connect to access China A Shares traded in mainland China. This may result in additional liquidity risk and operational risks including settlement and default risks, regulatory risk and system failure risk.
- The Fund may use derivatives (complex instruments) in an attempt to reduce the overall risk of its investments, reduce the costs of investing and/or generate additional capital or income, although this may not be achieved. The use of such complex instruments may result in greater fluctuations of the value of the Fund. The Manager, however, will ensure that the use of derivatives within the Fund does not materially alter the overall risk profile of the Fund.
- The Fund's performance may be adversely affected by variations in the relative strength of world currencies or if Sterling strengthens against those currencies.
- A more detailed description of risk factors that apply to this Fund is set out in Section 29 of the Prospectus.

Invesco UK Opportunities Fund (UK) (the "Fund")

A fund of Invesco UK Investment Series (the "Company")

Z Income share class (ISIN: GB00B8N46T57) (the "Share Class")

The Fund is managed by Invesco Fund Managers Limited, part of the Invesco Group.

Objectives and Investment Policy

- The objective of the Fund is to achieve long-term (5 years plus) capital growth.
- The Fund invests at least 80% of its assets in shares of companies incorporated, domiciled or carrying out the main part of their economic activity in the UK.
- The Fund may use derivatives (complex instruments) to manage the Fund more efficiently, with the aim of reducing risk, reducing costs and/or generating additional capital or income.
- The Fund has an active investment approach based on stock selection driven by the fund manager's assessment of valuation. The Fund is not constrained by a benchmark and has a flexible approach with no inbuilt bias to sector or company size, investing in what the fund manager believes are the best opportunities, in a typically concentrated portfolio of 35-45 stocks.
- The reference to (UK) in the Fund's name only relates to the Fund's domicile and is unrelated to the Fund's objective and investment policy.
- You can buy, sell and switch shares in the Fund on any Dealing Day (as defined in the Prospectus).

iShares US Equity Index Fund (UK)

A sub-fund of BlackRock Collective Investment Funds

Class D Accumulating GBP

ISIN: GB00B5VRGY09

Manager: BlackRock Fund Managers Limited

Objectives and Investment Policy

- ▶ The Fund aims to provide a return on your investment (generated through an increase in the value of the assets held by the Fund) by tracking closely the performance of the FTSE USA Index, the Fund's benchmark index.
- ▶ The Fund invests in equity securities (e.g. shares) of companies that make up the benchmark index.
- ▶ The benchmark index measures the performance of leading companies in the USA. The benchmark index is a free float-adjusted market capitalisation weighted index. Free float-adjusted means that only shares readily available in the market rather than all of a company's issued shares are used in calculating the benchmark index. Free float-adjusted market capitalisation is the share price of a company multiplied by the number of shares readily available in the market.
- ▶ The Fund is passively managed and the investment manager has limited discretion to select the Fund's investments and in doing so will take into consideration the benchmark index.
- ▶ The Fund intends to replicate the benchmark index by holding the equity securities, which make up the benchmark index, in similar proportions to the benchmark index.
- ▶ The Fund may also engage in short term secured lending of its investments to certain eligible third parties. This is used as a means of generating additional income and to off-set the costs of the Fund.
- ▶ Recommendation: This Fund may not be appropriate for short-term investment.
- ▶ Your units will be accumulating units (i.e. dividend income will be included in their value).
- ▶ Your units will be denominated in Sterling, the Fund's base currency.
- ▶ You can buy and sell your units daily. The minimum initial investment for this unit class is £100,000.

For more information on the Fund, share/unit classes, risks and charges, please see the Fund's prospectus, available on the product pages at www.blackrock.com

Risk and Reward Profile

- ▶ This indicator is based on historical data and may not be a reliable indication of the future risk profile of the Fund.
- ▶ The risk category shown is not guaranteed and may change over time.
- ▶ The lowest category does not mean risk free.
- ▶ The Fund is rated six due to the nature of its investments which include the risks listed below. These factors may impact the value of the Fund's investments or expose the Fund to losses.

- The value of equities and equity-related securities can be affected by daily stock market movements. Other influential factors include political, economic news, company earnings and significant corporate events.
- ▶ Particular risks not adequately captured by the risk indicator include:
 - Counterparty Risk: The insolvency of any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments, may expose the Fund to financial loss.

Charges

The charges are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

The entry and exit charges shown are maximum figures. In some cases you might pay less. Please refer to your financial advisor or the distributor for the actual entry and exit charges.

*Subject to a charge of up to 2% paid into the Fund where the Manager suspects excessive trading by an investor.

The ongoing charges figure is based on expenses for the twelve month period ending 31 December 2022. This figure may vary from year to year. It excludes portfolio trade-related costs, except costs paid to the custodian and any entry/exit charge paid to an underlying collective investment scheme (if any).

** To the extent the Fund undertakes securities lending to reduce costs, the Fund will receive 62.5% of the associated revenue generated and the remaining 37.5% will be received by BlackRock as the securities lending agent. As securities lending revenue sharing does not increase the costs of running the Fund, this has been excluded from the ongoing charges.

Jupiter India Fund I-Class

I-Class Accumulation Units, ISIN: GB00B4TZHH95

The Manager is Jupiter Unit Trust Managers Limited.

Objectives and investment policy

Objective

The Fund objective is to provide a return, net of fees, higher than that provided by the MSCI India Index over the long term (at least five years).

Policy

At least 70% of the Fund is invested in shares of companies based in India and in shares of investment trusts and other closed or open-ended funds, including other funds managed or operated by Jupiter or an associate of Jupiter, that are themselves dedicated to investments in India. A maximum of 10% in aggregate may be held in companies based in Pakistan, Sri Lanka and Bangladesh.

Up to 30% of the Fund may be invested in other transferable securities (including shares of companies based anywhere in the world), open-ended funds (including funds managed by Jupiter and its associates), cash, near cash, money market instruments and deposits.

The Fund may use derivatives (i.e. financial contracts whose value is linked to the expected price movements of an underlying investment) with the aim of reducing the overall costs and/or risks of the Fund.

Strategy

The fund manager takes a security-specific, 'Growth at a Reasonable Price' approach seeking to invest in companies which are 'best in class' growth companies benefitting from structural trends at reasonable valuations or where a growth opportunity is not fully reflected in the share price. The Fund will tend to invest in a well diversified portfolio of companies, across the market capitalisation spectrum, although more substantial positions will be held where the manager has the highest conviction which could lead to a meaningful allocation in small and medium sized companies.

Benchmarks

Target benchmark - MSCI India Index

The MSCI India Index is an industry standard index and is one of the leading representations of Indian stock markets. It is easily accessible and provides a fair reflection of the Fund Manager's investment universe and a good relative measure to assess performance outcomes.

Active Management

The Fund is actively managed. This means the fund manager is taking investment decisions with the intention of achieving the Fund's investment objective; this may include decisions regarding asset selection, regional allocation, sector views and overall level of exposure to the market. The fund manager is not in any way constrained by the benchmark in their portfolio positioning, and will not hold all, or indeed may not hold any, of the benchmark constituents.

Any income arising in relation to this unit class will be accumulated (i.e. automatically reinvested and reflected in the price of the shares).

Investors are able to buy and sell units during any business day between 9am and 5.30pm. If you tell us to buy or sell units before 12pm on any business day we will make the transaction on the same day. If you tell us to buy or sell units after 12pm we will make the transaction on the following business day.

Recommendation

This fund may not be suitable for investors who plan to withdraw their capital within 5 years.

Risk and reward profile

The Risk and Reward Indicator table demonstrates where the Fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is based on past data, may change over time and may not be a reliable indication of the future risk profile of the Fund. The shaded area in the table below shows the Fund's ranking on the Risk and Reward Indicator.

Typically lower rewards,
lower risk

Typically higher rewards,
higher risk

- The lowest category does not mean 'no risk'.
- The Fund is in this category due to the nature of its investments and previous levels of volatility (how much the value of the Fund rises and falls).
- **Currency (FX) Risk** - The Fund can be exposed to different currencies and movements in foreign exchange rates can cause the value of investments to fall as well as rise.
- **Pricing Risk** - Price movements in financial assets mean the value of assets can fall as well as rise, with this risk typically amplified in more volatile market conditions.
- **Emerging Markets Risk** - Emerging markets are potentially associated with higher levels of political risk and lower levels of legal protection relative to developed markets. These attributes may negatively impact asset prices.
- **Market Concentration Risk (Geographical Region/Country)** - Investing in a particular country or geographic region can cause the value of this investment to rise or fall more relative to investments whose focus is spread more globally in nature.
- **Derivative risk** - the Fund may use derivatives to reduce costs and/or the overall risk of the Fund (this is also known as Efficient Portfolio Management or "EPM"). Derivatives involve a level of risk, however, for EPM they should not increase the overall riskiness of the Fund.
- **Liquidity Risk (less liquid securities)** - some investments may be hard to value or sell at a desired time and price. In extreme circumstances this may affect the Fund's

ability to meet redemption requests upon demand.

- **Liquidity Risk (general)** - During difficult market conditions there may not be enough investors to buy and sell certain investments. This may have an impact on the value of the Fund.
- **Counterparty Risk** - the risk of losses due to the default of a counterparty e.g. on a derivatives contract or a custodian that is safeguarding the Fund's assets.
- **Smaller Companies** - The Fund invests in smaller companies, which can be less liquid than investments in larger companies and can have fewer resources than larger companies to cope with unexpected adverse events. In less favourable market conditions these companies may therefore under-perform larger companies and the Fund may under-perform funds that invest predominantly in larger companies.
- For a more detailed explanation of risk factors, please refer to the "Risk Factors" section of the Scheme Particulars.

Charges

- The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.
- The ongoing charges figure is based on the fixed annual charge as detailed in the Scheme Particulars. Where the Fund invests in other underlying funds, which may include closed-ended funds such as investment trusts, the ongoing charges figure will include the ongoing charges for those funds, and will therefore vary from year to year. The ongoing charges figure excludes portfolio transaction costs, except in the case of an entry/ exit charge paid by the Fund when buying or selling shares in another collective investment undertaking.
- Further information about charges is available in sections 18 and 19 of the Scheme Particulars which are available from Jupiter on request.

Jupiter Japan Income Fund IH Class

IH Class Income Units, ISIN: GB00B6496D90

The Manager is Jupiter Unit Trust Managers Limited.

Objectives and investment policy

Objective

The Fund objective is to provide income together with the prospect of capital growth in order to provide a return, net of fees, higher than that provided by the TOPIX Index over the long term (at least five years).

Policy

At least 70% of the Fund is invested in shares of companies based in Japan.

Up to 30% of the Fund may be invested in other transferable securities (including shares of companies based anywhere in the world), open-ended funds (including funds managed by Jupiter and its associates), cash, near cash, money market instruments and deposits.

The Fund may use derivatives (i.e. financial contracts whose value is linked to the expected price movements of an underlying investment) with the aim of reducing the overall costs and/or risks of the Fund.

Strategy

The fund manager takes a fundamental approach to selecting individual securities in order to construct a portfolio which gives investors broad exposure to Japanese equities.

The fund manager will apply a disciplined process to identify shares of companies which are well-managed, have competitive advantage and have the ability and willingness to grow shareholder pay-outs over time.

The Fund will tend to invest in a carefully selected number of companies where the manager has the highest conviction.

Benchmarks

Target benchmark – TOPIX Index

The TOPIX Index is an industry standard index and is one of the leading representations of Japanese stock markets. It is easily accessible and provides a fair reflection of the Fund Manager's investment universe and a good relative measure to assess performance outcomes.

Comparator benchmark - IA Japan Sector

Many funds sold in the UK are grouped into sectors by the Investment Association (the trade body that represents UK investment managers), to help investors to compare funds with broadly similar characteristics. This Fund is classified in the IA Japan Sector.

Active Management

The Fund is actively managed. This means the fund manager is taking investment decisions with the intention of achieving the Fund's investment objective; this may include decisions regarding asset selection, regional allocation, sector views and overall level of exposure to the market. The fund manager is not in any way constrained by the benchmark in their portfolio positioning, and will not hold all, or indeed may not hold any, of the benchmark constituents.

Any income arising in relation to this unit class will be distributed to investors on a regular basis.

Investors are able to buy and sell units during any business day between 9am and 5.30pm. If you tell us to buy or sell units before 12pm on any business day we will make the transaction on the same day. If you tell us to buy or sell units after 12pm we will make the transaction on the following business day.

This unit class will aim to remove the effect currency fluctuations between British Sterling and Japanese Yen have on Fund performance (both positive and negative).

Recommendation

This fund may not be suitable for investors who plan to withdraw their capital within 5 years.

Legal & General European Index Trust Unit Class I GBP Income - ISIN: GB00B0CNGQ43

The authorised fund manager of the Fund is Legal & General (Unit Trust Managers) Limited (the "Manager").

OBJECTIVES AND INVESTMENT POLICY

- The objective of the Fund is to track the performance of the FTSE World Europe ex UK Index, the "**Benchmark Index**" on a net total return basis before fees and expenses are applied. Fund performance may differ from the Benchmark Index due to the deduction of fees and expenses and the impact of any tracking error factors.
- The Benchmark Index is comprised of shares in middle and large capitalisation companies that are incorporated or headquartered or which have their principal business activities in the developed and advanced emerging markets in Europe excluding the UK, in accordance with the index provider's methodology.
- The Fund seeks to replicate the Benchmark Index and its investments will closely match those that make up the Benchmark Index. The Fund will have at least 90% exposure (directly or through depository receipts (a certificate issued by a bank representing shares in a foreign company such as American depository receipts and global depository receipts)) to assets that are included in the Benchmark Index.
- The Fund may also invest in shares in companies which are reasonably expected to become part of the Benchmark Index in the near future or are an alternative to a constituent of the Benchmark Index, money market instruments (such as treasury bills), depository receipts, cash, deposits and collective investment schemes, including those managed or operated by the Manager or an associate of the Manager.
- The Fund may use derivatives (contracts which have a value linked to the price of another asset) to:
 - reduce risk or cost; or
 - generate additional capital or income with no, or an acceptably low, level of risk.

Other information:

- The Fund is passively managed as it tracks the Benchmark Index.
- Your units will be income units. Income from the Fund's investments will be paid out to you annually (as dividends). This will reduce your capital growth accordingly.
- You can buy or sell units in this Fund on any business day. You need to contact us with your instruction before 12 noon. This is the time we calculate unit prices for this Fund. If you contact us after 12 noon, the units will be bought or sold at the next business day's price.
- The Fund's base currency is denominated in GBP.
- This Fund may be suitable for investors looking to invest in shares of European companies (excluding the UK) as represented by the Benchmark Index.
- Although investors can take their money out at any time, this Fund may not be appropriate for those who plan to withdraw their money within five years.
- This Fund is not designed for investors who cannot afford more than a minimal loss of their investment.
- If you do not understand this document we recommend you seek additional information to help you decide if this Fund is right for you.

RISK AND REWARD PROFILE

- The Risk and Reward Indicator table demonstrates where the Fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is not guaranteed to remain the same and may change over time. It is based on historical data and may not be a reliable indication of the future risk profile of the Fund. The shaded area in the table above shows the Fund's ranking on the Risk and Reward Indicator.
- The Fund is in category 6 because it invests in company shares which are sensitive to variations in the stock market. The value of company shares can change substantially over short periods of time. Company shares are generally considered to be higher risk investments than bonds or cash.

- Even a fund in the lowest category is not a risk free investment.
 - The value of your investment and any income you take from it may fall as well as rise and is not guaranteed. You might get back less than you invest. Further information on the risks of investing in this fund is contained in the Prospectus available at www.legalandgeneral.com/reports.
- The risk and reward indicator may not take account of the following risks of investing in the Fund:
- The Fund may have underlying investments that are valued in currencies that are different from GBP. Exchange rate fluctuations will impact the value of your investment. Currency hedging techniques may be applied to reduce this impact but may not entirely eliminate it.
 - Derivatives are highly sensitive to changes in the value of the asset on which they are based and can increase the size of losses and gains.
 - The Fund could lose money if any institutions providing services such as acting as counterparty to derivatives or other instruments, becomes unwilling or unable to meet its obligations to the Fund.

CHARGES

Charges taken from the fund under certain specific conditions

| | |
|-----------------|------|
| Performance fee | None |
|-----------------|------|

- There are no entry or exit charges.
- The ongoing charges figure is based on the latest available expenses at January 2023. This figure may vary from year to year.
- This Fund's ongoing charges include any charges made by any other funds it may invest in. They exclude portfolio transaction costs.
- The ongoing charges are taken from the Income of the Fund.

Other costs:

- **Dilution adjustment:** On any day, the prices for buying or selling units in this Fund are the same. The Fund manager calculates a single price for this Fund based on the mid-point between the buying and selling prices of the Fund's assets. In certain circumstances, the Fund manager can adjust this price to account for whether there is more money going into or coming out of the Fund. This is called a 'dilution adjustment'.
- This can vary but as an example for this Fund we estimate 0.17% for purchases and 0.08% for sales at 02 February 2023. The amount of the dilution adjustment may differ in future.

For more information about charges and costs, please see the charges and expenses section in the Fund's Prospectus, or visit our website at www.legalandgeneral.com/chargesandfees.

PAST PERFORMANCE

- Past performance is not a guide to future performance.
- The figures for the Fund take into account the ongoing charges and assume income (after any tax) is reinvested.
- The performance has been calculated in GBP.
- The Fund may not replicate the performance of the Benchmark Index perfectly due to tracking errors such as expenses, tax and transaction costs incurred by the Fund, which are not included in the Index.
- The annual return is for a 12 month period ending 31 December.
- The Fund launched in 1989.
- This unit class launched in 2005.

Legal & General Strategic Bond Fund Unit Class I GBP Income - ISIN: GB00B1TWMY10

The authorised fund manager of the Fund is Legal & General (Unit Trust Managers) Limited (the "Manager").

OBJECTIVES AND INVESTMENT POLICY

- The objective of this Fund is to provide income and growth.
 - The Fund is actively managed and may invest at least 80% in investment grade (rated as lower risk) and sub-investment grade (rated as higher risk) bonds with a credit rating from a recognised credit rating service or which are listed or traded in an OECD Country (the Organisation for Economic Co-operation and Development). Bonds are types of loan which pay interest. Credit ratings give an indication of how likely it is that the issuer of a bond will be able to pay back interest and the loan on time.
 - These are bonds with a credit rating from a nationally recognised statistical rating organisation (NRSRO) or non-rated bonds that are assessed as being a equivalent rating by the Manager.
 - The bonds held may be issued by companies or governments and may be issued in the UK or overseas.
 - The Fund will have a net exposure of at least 80% to Sterling.
 - The Fund may also use a variety of derivative transactions (financial instruments whose value is linked to the price of an underlying instruments) for both investment purposes to enhance the performance of the fund and efficient portfolio management to reduce risk or cost.
 - Where considered in the interests of investors, derivatives may be used to synthetically alter the characteristic of the bonds, such as to protect against credit and duration risk. Duration risk measures the sensitivity of bond prices to changes in interest rates.
 - The types of derivatives used include credit default swaps, interest rate swaps, foreign exchange and other Over the Counter (OTC) instruments as well as exchange traded instruments including futures and options.
 - The use of derivatives for these purposes may be extensive and may affect the volatility or risk profile of the fund although this is not the intention.
 - The Fund may also invest in transferable securities, such as company shares, asset and mortgage backed securities and loans, contingent convertible bonds, collective investment schemes, money market instruments, cash and deposits. The collective investment schemes in which the fund may invest may include schemes which are managed or operated by the Manager or an associate of the Manager.
- Other information:**
- The Fund is actively managed as the Manager uses their expertise to select investments to achieve the Fund's objectives.
 - The IA Sterling Strategic Bond is a benchmark which is used as a performance comparator of the Fund. See the Past Performance section for further details.
 - Your units will be income units. Income from the Fund's investments will be paid out to you every three months (as interest). This will reduce your capital growth accordingly.
 - You can buy or sell units in this Fund on any business day. You need to contact us with your instruction before 3pm. This is the time we calculate unit prices for this Fund. If you contact us after 3pm, the units will be bought or sold at the next business day's price.
 - The Fund's base currency is denominated in GBP.
 - This Fund is designed for investors looking for growth and income from an investment in a range of bonds, derivatives and/or cash.
 - Although investors can take their money out at any time, this Fund may not be appropriate for those who plan to withdraw their money within five years.
 - This Fund is not designed for investors who cannot afford more than a minimal loss of their investment.
 - If you do not understand this document we recommend you seek additional information to help you decide if this Fund is right for you.

 - The value of your investment and any income you take from it may fall as well as rise and is not guaranteed. You might get back less than you invest.
- Further information on the risks of investing in this fund is contained in the Prospectus available at www.legalandgeneral.com/reports. The risk and reward indicator may not take account of the following risks of investing in the Fund:
- The Fund may have underlying investments that are valued in currencies that are different from GBP. Exchange rate fluctuations will impact the value of your investment. Currency hedging techniques may be applied to reduce this impact but may not entirely eliminate it.
 - Derivatives are highly sensitive to changes in the value of the asset on which they are based and can increase the size of losses and gains. The impact to the Fund can be greater where derivatives are used in an extensive or complex way.
 - The Fund could lose money if any institutions providing services such as acting as counterparty to derivatives or other instruments, becomes unwilling or unable to meet its obligations to the Fund.
 - The Fund invests directly or indirectly in bonds which are issued by companies or governments. If these companies or governments experience financial difficulty, they may be unable to pay back some or all of the interest, original investment or other payments that they owe. If this happens, the value of the Fund may fall.
 - This Fund holds bonds that are traded through agents, brokers or investment banks matching buyers and sellers. This makes the bonds less easy to buy and sell than investments traded on an exchange. In exceptional circumstances the Fund may not be able to sell bonds and may defer withdrawals, or suspend dealing. The Directors can only delay paying out if it is in the interests of all investors and with the permission of the Fund depositary.
 - Investment returns on bonds are sensitive to trends in interest rate movements. Such changes will affect the value of your investment.
 - We may take some or all of the ongoing charges from the Fund's capital rather than the Fund's income. This increases the amount of income, but it reduces the growth potential and may lead to a fall in the value of the Fund.

CHARGES

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential return from your investment.

One-off charges taken before or after you invest

| | |
|--------------|-------|
| Entry charge | 0.00% |
| Exit charge | 0.00% |

This is the maximum that might be taken out of your money before it is invested.

The price for buying and selling units is subject to a Dilution Adjustment See opposite.

Charges taken from the fund over each year

| | |
|----------------|-------|
| Ongoing charge | 0.63% |
|----------------|-------|

Charges taken from the fund under certain specific conditions

| | |
|-----------------|------|
| Performance fee | None |
|-----------------|------|

- There are no entry or exit charges.
- The ongoing charges figure is based on the latest available expenses at July 2022. This figure may vary from year to year.
- This Fund's ongoing charges include any charges made by any other funds it may invest in. They exclude portfolio transaction costs.
- The ongoing charges are taken partly from the income and partly from the capital of the Fund.

Other costs:

- **Dilution adjustment:** On any day, the prices for buying or selling units in this Fund are the same. The Fund manager calculates a single price for this Fund based on the mid-point between the buying and selling prices of the Fund's assets. In certain circumstances, the Fund manager can adjust this price to account for whether there is more money going into or coming out of the Fund. This is called a 'dilution adjustment'.
- This can vary but as an example for this Fund we estimate 0.35% for purchases and 0.35% for sales at 02 September 2022. The amount of the dilution adjustment may differ in future.

For more information about charges and costs, please see the charges and expenses section in the Fund's Prospectus, or visit our website at www.legalandgeneral.com/chargesandfees.

Key Investor Information Document

Lazard Global Listed Infrastructure Equity Fund A Dist GBP

Lazard Global Listed Infrastructure Equity Fund is a sub-fund of Lazard Global Active Funds Public Limited Company (the "UCITS")

ISIN: IE00B5NXXH66

This Fund is managed by Lazard Fund Managers (Ireland) Limited, part of the Lazard Group

Objectives and Investment Policy

Lazard Global Listed Infrastructure Equity Fund (the "Fund") aims to achieve over the long-term total returns comprising income and capital appreciation.

The Fund is actively managed and will seek to achieve its investment objective primarily through investment on a global basis in equities (i.e. shares) and equity-related instruments (i.e. shares including common and preferred stock, warrants and rights) of Infrastructure Companies.

In identifying the Infrastructure Companies in which the Fund will invest, the Investment Manager applies a series of objective filters and qualitative criteria to the general investment universe of infrastructure companies to produce a "preferred universe". The stocks of the "preferred universe" are then individually assessed and ranked, using fundamental analysis to determine the valuation of each company.

The Fund may also invest up to 10% of its value in units or shares of other investment funds (including exchange traded funds and other sub-funds of the UCITS). In addition, the Fund may invest on a global basis in Convertible Securities (which are investments that are convertible into equity securities of the issuer) and in units or shares of closed-ended listed funds.

In order to ensure full flexibility to seek exposure to Infrastructure Companies on a world-wide basis, in excess of 20% of the value of the Fund may be invested in emerging markets.

The Fund may invest in cash and in investments that are deemed to be nearly equivalent to cash at any time and to the extent considered appropriate in light of market conditions.

The Fund may use derivatives (which are financial contracts whose value is linked to the price of an underlying investment). The currency exposures of the Fund's portfolio will be

substantially hedged back into Sterling, being the base currency of the Fund. As a result of its use of derivatives, the Fund may be 'geared' or 'leveraged' (which can lead to a proportionately much larger movement in the value of the Fund's assets). The expected levels of the Fund's leverage may at no time exceed 40% of the value of the Fund.

You can buy and sell shares in the Fund on any day on which the stock exchanges in London, New York and Sydney are open for business.

The Fund has discretion as to which investments it will hold within the limits of the Investment Objective and Policy.

Any distributions that are paid to you will normally be reinvested to buy further shares unless you have elected to receive payment in cash.

The Fund's performance is measured against the performance of the MSCI World Core Infrastructure Index (the "Benchmark"), which the Investment Manager has assessed to be the most appropriate Benchmark for measuring performance. The performance of the Fund seeks to exceed the Benchmark performance. The Fund is not constrained by the Benchmark as it has flexibility to invest in securities and asset classes not included in the Benchmark.

The Fund promotes environmental and/or social characteristics within the meaning of Article 8 of Regulation (EU) 2019/2088, the "SFDR Regulation".

Recommendation: This Fund may not be appropriate for investors who plan to withdraw their money within a short period of time.

Risk and Reward Profile

The risk and reward categories above are calculated using historic data and may not be a reliable indicator of the Fund's future risk profile. The risk and reward category may shift over time and is not a target or guarantee.

The lowest category (i.e. category 1) does not mean "risk free".

The risk rating of this share class is calculated on the basis of historic volatility – i.e. how much the value of the underlying assets of the Fund has fluctuated over the last 5 years.

This share class has been placed in the risk category stated above, because based on the historic data, the underlying assets within the Fund have shown moderately high volatility.

Please note, there are other risks that may not be reflected in the risk and reward categories above. Some of these risks are summarised below.

- There is no capital guarantee or protection of the value of the Fund. The value of your investment and the income from it can go down as well as up and you may not get back the amount you originally invested.
- As the Fund invests on a global basis in Infrastructure Companies, it may be less diversified than other funds investing in a broader range of industries. Securities and

instruments of Infrastructure Companies may be more susceptible to adverse economic, political or regulatory occurrences affecting their industries and may be subject to a variety of factors that may adversely affect their business or operations, including additional costs, competition, regulatory implications and certain other factors.

- This Fund may invest in the securities of emerging markets. These markets may be less developed than others and so there is a greater risk that the Fund may experience greater volatility, delays in buying, selling and claiming ownership of its investments. Emerging markets may also have less developed political, economic and legal systems and there is a higher risk that the Fund may not get back its money.
- There is a risk that the other side to certain contracts that the Fund may enter into may not be able to meet obligations. For example, this may arise in the Fund where an investment is made using a derivative, and the other side to the derivative contract becomes insolvent, or is otherwise unable to meet its obligations. In such a case, the Fund may incur loss.
- The Fund may invest in units or shares of other investment funds. Such other funds may themselves be subject to their own fees and expenses.
- The returns from your investment may be affected by changes in the exchange rate between the Fund's base currency, the currency of the Fund's investments, your share class and your home currency.

See "Risk Factors" in the UCITS' Prospectus and Fund Supplement for more information about risks.

The entry and exit charges shown are maximum figures. In some cases you may pay less. You can find out the actual charges from your financial advisor.

The ongoing charges figure stated in the table is an estimate of the charges based on the expected charges that will be taken from the Fund over the year and does not include any performance fee or portfolio transaction costs incurred where we buy or sell assets for the Fund. Ongoing charges may vary from year to year.

An amount for "Duties and Charges" as defined in the UCITS' Prospectus may be applied.

The Directors may, in their absolute discretion, charge a switching fee of up to 1% of the Net Asset Value of the shares to be switched.

Please see "Fees and Expenses" in the UCITS' Prospectus, Fund Supplement and Appendix I Share Class Details of the Fund Supplement.

Practical Information

The UCITS' depositary is State Street Custodial Services (Ireland) Limited.

The Fund is one of a number of sub-funds of the UCITS. The assets and liabilities of each sub-fund are segregated by law from each other and the rights of investors and creditors in relation to a sub-fund should normally be limited to the assets of that sub-fund.

You may switch between sub-funds of the UCITS. See "Switching Between Share Classes and Funds" in the UCITS' Prospectus.

Further information about the Fund may be obtained from the UCITS' Prospectus (available in English and German), the annual and half-yearly Report and Accounts which are prepared for the UCITS as a whole (available in English, German and Italian). These documents are available free of charge from Lazard Asset Management Limited, 50 Stratton Street, London, W1J 8LL or at www.lazardassetmanagement.com.

The Fund is subject to the tax legislation of Ireland. This may have an impact on your personal tax position.

Latest share prices of the UCITS are available at www.lazardassetmanagement.com.

Details of Lazard Fund Managers (Ireland) Limited's Remuneration Policy, including a description of how remuneration and benefits are calculated and the identities of the persons responsible for awarding such remuneration/benefits, can be accessed from the following website: www.lazardassetmanagement.com. A paper copy of these policy details is also available free of charge from Lazard Fund Managers (Ireland) Limited upon request.

Lazard Fund Managers (Ireland) Limited may be held liable solely on the basis of any statement contained in this document that is misleading, inaccurate or inconsistent with the relevant parts of the UCITS' Prospectus.

Liontrust European Dynamic Fund is an Authorised Unit Trust and categorised as a UCITS scheme. This document is based upon the I Inc class (ISIN: GB00B4ZM1M76). This Fund is managed by Liontrust Fund Partners LLP, a subsidiary of Liontrust Asset Management PLC.

Objective

- The Fund aims to deliver capital growth over the long-term (5 years or more).

Policy

- The Fund is considered to be actively managed in reference to the benchmark(s) in the performance table by virtue of the fact that it uses the benchmark(s) for performance comparison purposes. The benchmark(s) are not used to define the portfolio composition of the Fund and the Fund may be wholly invested in securities which are not constituents of the benchmark.
- The Fund will invest in companies which are incorporated, domiciled, listed or conduct significant business in the EEA or Switzerland, but excludes shares listed in the UK.
- The Fund will typically invest 95% (minimum 80%) of its assets in equities or equity related derivatives but may also invest in collective investment schemes (up to 10% of Fund assets), corporate debt securities, other transferable securities, money market instruments, warrants, cash and deposits.
- The Fund is permitted to use derivatives for the purposes of efficient portfolio management and for investment purposes. Please refer to the Derivatives sections in the prospectus for further details.
- As result of the investment process employed, the proportion of the Fund that is invested in growth companies versus value opportunities will change dynamically over time depending on the investment opportunities available in the market.

Recommendation

- This Fund may not be appropriate for investors who plan to withdraw their money within 5 years.

How to buy

- You may buy or sell units on a daily basis (but not weekends or Bank Holidays). Orders must be received by 11:59am for execution at 12:00 midday valuation point on the same day. Further details can be found at www.liontrust.co.uk.

Investment process

- The philosophy is based on the mistakes people make when forecasting. The fund managers believe stock prices are frequently mispriced as they tend to reflect the often unreliable and, at times, completely misleading, forecasts of future profitability made by company managers.
- The fund managers find, in contrast, that historical analysis of company cash flows is a more reliable guide to future profitability and stock price valuation in the medium term.
- The Fund focuses on the historic cash flows generated and invested by companies to support their forecast profits growth. As forecasts are often unreliable, the scale of cash invested to support forecasts is key.
- The Fund seeks to own companies that generate significantly more cash than they need to sustain their planned growth, yet are lowly valued by investors on that measure.
- To identify companies' annual cash flow, balance sheet development and valuation efficiently across all equity markets the fund managers have developed a simple screen as a starting point for further qualitative analysis. The investment screen consists of two cash flow ratios that are combined equally to highlight the process characteristics that they seek.
- The two cash flow measures are:
 - cash flow relative to operating assets; and
 - cash flow relative to market value.

Risk and reward profile

- This Synthetic Risk and Reward Indicator (SRRI) is based on historical data and may not be relied upon to gauge the future risk profile of the Fund.
- The SRRI shown is not guaranteed to remain the same and may shift over time.
- The lowest category (1) does not mean 'risk free'.
- The Fund's risk and reward category has been calculated using the methodology set by the European Commission. It is based upon the rate by which the Fund or a representative fund or index's value has moved up and down in the past.
- The Fund is categorised 6 for its exposure to European (ex UK) equities.
- The SRRI may not fully take into account the following risks:
 - that a company may fail thus reducing its value within the Fund;
 - overseas investments may carry a higher currency risk. They are valued by reference to their local currency which may move up or down when compared to the currency of the Fund.
- This Fund may have a concentrated portfolio, i.e. hold a limited number of investments. If one of these investments falls in value this can have a greater impact on the Fund's value than if it held a larger number of investments.
- The Fund may, under certain circumstances, invest in derivatives, but it is not intended that their use will materially affect volatility. Derivatives are used to protect against currencies, credit and interest rate moves or for investment purposes. There is a risk that losses could be made on derivative positions or that the counterparties could fail to complete on transactions. The use of derivatives may create leverage or gearing resulting in potentially greater volatility or fluctuations in the net asset value of the Fund. A relatively small movement in the value of a derivative's underlying investment may have a larger impact, positive or negative, on the value of a fund than if the underlying investment was held instead. The use of derivative contracts may help us to control Fund volatility in both up and down markets by hedging against the general market.

- The Fund may encounter liquidity constraints from time to time. The spread between the price you buy and sell shares will reflect the less liquid nature of the underlying holdings.
- The Fund has both Hedged and Unhedged share classes available. The Hedged share classes use forward foreign exchange contracts to protect returns in the base currency of the Fund.
- Outside of normal conditions, the Fund may hold higher levels of cash which may be deposited with several credit counterparties (e.g. international banks). A credit risk arises should one or more of these counterparties be unable to return the deposited cash.
- Counterparty Risk: any derivative contract, including FX hedging, may be at risk if the counterparty fails.
- ESG Risk: there may be limitations to the availability, completeness or accuracy of ESG information from third-party providers, or inconsistencies in the consideration of ESG factors across different third party data providers, given the evolving nature of ESG.
- For full details of the Fund's risks, please see the prospectus which may be obtained from Liontrust (address overleaf) or online at www.liontrust.co.uk.

M&G Emerging Markets Bond Fund

a sub-fund of M&G Investment Funds (3)

Sterling Class I – Accumulation shares ISIN no. GB00B7GNKY53

Managed by M&G Securities Limited

Objective and investment policy

The fund aims to provide a combination of capital growth and income, net of the Ongoing Charge Figure, higher than that of a composite index over any five-year period.

The composite index is 1/3 JPM EMBI Global Diversified Index, 1/3 JPM CEMBI Broad Diversified Index and 1/3 JPM GBI-EM Global Diversified Index.

Core investment: At least 80% of the fund is invested, directly or through derivatives, in bonds issued by the governments, government-related institutions or companies of emerging markets. These bonds can be denominated in any currency, including emerging market currencies. The fund invests in bonds of any credit quality and may invest up to 100% in high yield bonds.

Other investments: The fund may invest in asset-backed securities, other funds (including funds managed by M&G) and cash or assets that can be turned into cash quickly.

Derivatives usage: For investment purposes and to reduce risk and cost.

Strategy in brief: The fund manager selects investments based on an assessment of global, regional, and country-specific macroeconomic factors, followed by in-depth analysis of individual bond issuers. The fund is diversified by investing in a range of bonds across emerging markets.

Benchmark: A composite index comprising:

- 1/3 JPM EMBI Global Diversified Index
- 1/3 JPM CEMBI Broad Diversified Index
- 1/3 JPM GBI-EM Global Diversified Index

The benchmark is a target which the fund seeks to outperform. The composite index has been chosen as the benchmark as it best reflects the scope of the fund's investment policy. The benchmark does not constrain portfolio construction.

The fund is actively managed. The fund manager has complete freedom in choosing which investments to buy, hold and sell in the fund. The fund's holdings may deviate significantly from the benchmark's constituents.

The benchmark is shown in the share class currency.

The following information can be found on the M&G website:

- a [glossary](#) providing an explanation of some terms used in this document
- the Prospectus including the fund's objective and investment policy.

Other information

The fund may invest more than 35% in securities issued or guaranteed by a member state of the European Economic Area or other countries listed in the fund's Prospectus. This investment may be combined with the use of derivatives in pursuit of the fund's investment objective.

You can buy and sell shares in the fund on any business day. Instructions received before 12 noon will be dealt at that day's price.

Any income from the fund will be rolled up into the value of your investment.

In addition to the charges set out in the charges section, the fund will incur portfolio transaction costs which are paid from the assets of the fund. These can be higher when investing outside Europe.

Recommendation: This fund may not be appropriate for investors who plan to withdraw their money within 3 years.

Risk and reward profile

▪ The above risk and reward indicator is based on historical data and may not be a reliable indication of the future risk profile of this share class. This Share Class is categorised in risk class 4 because its Net Asset Value has shown medium rises and falls in value historically.

- The risk number shown is not guaranteed and may change over time.
- The lowest risk number does not mean risk free.

The main risks that could affect performance are set out below:

- The value and income from the fund's assets will go down as well as up. This will cause the value of your investment to fall as well as rise. There is no guarantee that the fund will achieve its objective and you may get back less than you originally invested.
- Investing in emerging markets involves a greater risk of loss due to greater political, tax, economic, foreign exchange, liquidity and regulatory risks, among other factors. There may be difficulties in buying, selling, safekeeping or valuing investments in such countries.
- Investments in bonds are affected by interest rates, inflation and credit ratings. It is possible that bond issuers will not pay interest or return the capital. All of these events can reduce the value of bonds held by the fund.
- The fund can be exposed to different currencies. Movements in currency exchange rates may adversely affect the value of your investment.
- The fund may use derivatives to profit from an expected rise or fall in the value of an asset. Should the asset's value vary in an unexpected way, the fund will incur a loss. The fund's use of derivatives may be extensive and exceed the value of its assets (leverage). This has the effect of magnifying the size of losses and gains, resulting in greater fluctuations in the value of the fund.
- In exceptional circumstances where assets cannot be fairly valued, or have to be sold at a large discount to raise cash, we may temporarily suspend the fund in the best interest of all investors.
- The fund could lose money if a counterparty with which it does business becomes unwilling or unable to repay money owed to the fund.
- Operational risks arising from errors in transactions, valuation, accounting, and financial reporting, among other things, may also affect the value of your investments.

Further details of the risks that apply to the fund can be found in the fund's Prospectus at www.mandg.co.uk/literature

Charges

The charges shown in the table are used to pay the costs of running the fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

M&G Global Emerging Markets Fund

a sub-fund of M&G Investment Funds (7)

Sterling Class I – Accumulation shares ISIN no. GB00B3FFXX47

Managed by M&G Securities Limited

Objective and investment policy

The fund aims to provide a combination of capital growth and income, net of the Ongoing Charge Figure, that is higher than that of the MSCI Emerging Markets Index over any five-year period.

Core investment: At least 80% of the fund is directly invested in the shares of companies that are based, or do most of their business, in emerging markets.

Other investments: The fund may invest in other funds (including funds managed by M&G) and cash or assets that can be turned into cash quickly.

Derivatives usage: To reduce risk and costs.

Strategy in brief: The fund manager selects stocks using a bottom-up approach across a range of sectors. A long-term perspective is adopted to identify companies whose long-term prospects are, in the fund manager's opinion, being undervalued. It is the core belief of the fund manager that corporate governance and company-specific factors, in particular their profitability (which is measured in terms of return on capital), drive share prices over the long run. The fund's country and sector exposure is not influenced by top-down views.

Benchmark: MSCI Emerging Markets Index

The benchmark is a target which the fund seeks to outperform. The index has been chosen as the fund's benchmark as it best reflects the scope of the fund's investment policy. The benchmark is used solely to measure the fund's performance and does not constrain the fund's portfolio construction.

The fund is actively managed. The fund manager has complete freedom in choosing which investments to buy, hold and sell in the fund. The fund's holdings may deviate significantly from the benchmark's constituents.

For unhedged and hedged share classes, the benchmark is shown in the share class currency.

The following information can be found on the M&G website:

- a [glossary](#) providing an explanation of some terms used in this document
- the Prospectus including the fund's objective and investment policy.

Other information

You can buy and sell shares in the fund on any business day. Instructions received before 12 noon will be dealt at that day's price.

Any income from the fund will be rolled up into the value of your investment.

In addition to the charges set out in the charges section, the fund will incur portfolio transaction costs which are paid from the assets of the fund. These can be higher when investing outside Europe.

Recommendation: This fund may not be appropriate for investors who plan to withdraw their money within 5 years.

Risk and reward profile

▪ The above risk and reward indicator is based on historical data and may not be a reliable indication of the future risk profile of this share class. This Share Class is categorised in risk class 6 because its Net Asset Value has shown high rises and falls in value historically.

▪ The risk number shown is not guaranteed and may change over time.

▪ The lowest risk number does not mean risk free.

The main risks that could affect performance are set out below:

▪ The value and income from the fund's assets will go down as well as up. This will cause the value of your investment to fall as well as rise. There is no guarantee that the fund will achieve its objective and you may get back less than you originally invested.

▪ Investing in emerging markets involves a greater risk of loss due to greater political, tax, economic, foreign exchange, liquidity and regulatory risks, among other factors. There may be difficulties in buying, selling, safekeeping or valuing investments in such countries.

▪ The fund can be exposed to different currencies. Movements in currency exchange rates may adversely affect the value of your investment.

▪ In exceptional circumstances where assets cannot be fairly valued, or have to be sold at a large discount to raise cash, we may temporarily suspend the fund in the best interest of all investors.

▪ The fund could lose money if a counterparty with which it does business becomes unwilling or unable to repay money owed to the fund.

▪ Operational risks arising from errors in transactions, valuation, accounting, and financial reporting, among other things, may also affect the value of your investments.

Further details of the risks that apply to the fund can be found in the fund's Prospectus at www.mandg.co.uk/literature

Charges

The charges shown in the table are used to pay the costs of running the fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

| One-off charges taken before or after you invest | |
|---|-------|
| Entry charge | 0.00% |
| Exit charge | 0.00% |
| This is the maximum that might be taken out of your money before it is invested or before the proceeds of your investment are paid out. | |
| Charges taken from the fund over a year | |
| Ongoing charge | 0.75% |
| Charges taken from the fund under certain specific conditions | |
| Performance fee | None |

M&G Managed Growth Fund

a sub-fund of M&G Investment Funds (4)

Sterling Class I – Accumulation shares ISIN no. GB00B7K52D01

Managed by M&G Securities Limited

Objective and investment policy

The fund aims to provide a combination of capital growth and income, net of the Ongoing Charge Figure, that is higher than the average return of the IA Flexible Investment Sector over any five-year period.

Core investment: At least 70% of the fund is invested in other funds to gain exposure to a mix of assets including company shares, bonds, convertibles and cash from anywhere in the world. The fund may also invest directly in these assets. In aggregate, a minimum of 70% of the fund is invested in company shares, directly or through other funds.

Other investments: The fund may invest in company shares and cash or assets that can be turned into cash quickly.

Derivatives usage: For investment purposes and to reduce risk and cost.

Strategy in brief: The fund manager's investment views are mainly implemented by investing in other funds. This is typically via M&G's own funds, but the fund may also invest in funds managed by other companies where appropriate in order to best reflect the fund manager's investment views. The fund has a flexible investment approach, with the freedom to respond to changes in economic conditions and the valuation of assets. The approach combines in-depth research to work out the value of assets over the medium to long term, with analysis of market reactions to events to identify investment opportunities. In particular, the fund manager seeks to respond when asset prices move away from a reasonable sense of "fair" long-term value due to the market's reaction to events.

Benchmark: IA Flexible Investment Sector

The benchmark is a target which the fund seeks to outperform. The sector has been chosen as the fund's benchmark as the fund is a constituent of the sector. The benchmark is used solely to measure the fund's performance and does not constrain the fund's portfolio construction.

The fund is actively managed. The fund manager has complete freedom in choosing which investments to buy, hold and sell in the fund.

For unhedged and hedged share classes, the benchmark is shown in the share class currency.

The following information can be found on the M&G website:

- a [glossary](#) providing an explanation of some terms used in this document
- the Prospectus including the fund's objective and investment policy.

Other information

You can buy and sell shares in the fund on any business day. Instructions received before 12 noon will be dealt at that day's price.

Any income from the fund will be rolled up into the value of your investment.

In addition to the charges set out in the charges section, the fund will incur portfolio transaction costs which are paid from the assets of the fund. These can be higher when investing outside Europe.

Recommendation: This fund may not be appropriate for investors who plan to withdraw their money within 5 years.

Risk and reward profile

■ The above risk and reward indicator is based on historical data and may not be a reliable indication of the future risk profile of this share class. This Share Class is categorised in risk class 5 because its Net Asset Value has shown medium to high rises and falls in value historically.

- The risk number shown is not guaranteed and may change over time.
- The lowest risk number does not mean risk free.

The main risks that could affect performance are set out below:

- The value and income from the fund's assets will go down as well as up. This will cause the value of your investment to fall as well as rise. There is no guarantee that the fund will achieve its objective and you may get back less than you originally invested.
- The fund invests in other funds, which are subject to the risks associated with the type of assets held in those funds.
- The fund can be exposed to different currencies. Movements in currency exchange rates may adversely affect the value of your investment.
- Investments in bonds are affected by interest rates, inflation and credit ratings. It is possible that bond issuers will not pay interest or return the capital. All of these events can reduce the value of bonds held by the fund.
- Investing in emerging markets involves a greater risk of loss due to greater political, tax, economic, foreign exchange, liquidity and regulatory risks, among other factors. There may be difficulties in buying, selling, safekeeping or valuing investments in such countries.
- The fund may use derivatives to profit from an expected rise or fall in the value of an asset. Should the asset's value vary in an unexpected way, the fund will incur a loss. The fund's use of derivatives may be extensive and exceed the value of its assets (leverage). This has the effect of magnifying the size of losses and gains, resulting in greater fluctuations in the value of the fund.
- Convertibles are subject to the risks associated with both bonds and company shares, and to risks specific to the asset class. Their value may change significantly depending on economic and interest rate conditions, the creditworthiness of the issuer and the performance of the underlying company shares. In addition, issuers of convertibles may fail to meet payment obligations and their credit ratings may be downgraded. Convertibles may also be harder to sell than the underlying company shares.
- In exceptional circumstances where assets cannot be fairly valued, or have to be sold at a large discount to raise cash, we may temporarily suspend the fund in the best interest of all investors.
- The fund could lose money if a counterparty with which it does business becomes unwilling or unable to repay money owed to the fund.
- Operational risks arising from errors in transactions, valuation, accounting, and financial reporting, among other things, may also affect the value of your investments.

Further details of the risks that apply to the fund can be found in the fund's Prospectus at www.mandg.co.uk/literature

M&G Short Dated Corporate Bond Fund

a sub-fund of M&G Investment Funds (2)

Sterling Class I – Income shares ISIN no. GB00B8JXBQ82

Managed by M&G Securities Limited

Objective and investment policy

The fund aims to provide a combination of capital growth and income, net of the Ongoing Charge Figure, that is higher than the Markit iBoxx EUR Corporates 1-3 year Index (GBP Hedged) over any five-year period.

Core investment: At least 80% of the fund is invested directly or through derivatives, in investment grade bonds and asset-backed securities issued by companies from anywhere in the world, including emerging markets. These securities can be denominated in any currency.

The fund typically invests in bonds which have short repayment dates and, as a result, it has a low portfolio duration.

The fund aims to hedge any non-sterling assets back to sterling.

Other investments: The fund may invest in high yield bonds, other funds (including funds managed by M&G) and cash or assets that can be turned into cash quickly.

Derivatives usage: For investment purposes and to reduce risk and cost.

Strategy in brief: The fund typically invests in bonds due to be repaid within a short period so as to minimise the effect of interest rate movements on the fund's value. Asset allocation and stock selection are at the heart of the investment process. Spreading investments across issuers, sectors and countries is an essential element of the strategy.

Benchmark: Markit iBoxx EUR Corporates 1-3 year Index (GBP Hedged)

The benchmark is a target which the fund seeks to outperform. The index has been chosen as the benchmark as it best reflects the scope of the fund's investment policy. The benchmark is used solely to measure the fund's performance and does not constrain portfolio construction.

The fund is actively managed. The fund manager has complete freedom in choosing which investments to buy, hold and sell in the fund. The fund's holdings may deviate significantly from the target benchmark's constituents.

The benchmark is shown in the share class currency.

The following information can be found on the M&G website:

- a [glossary](#) providing an explanation of some terms used in this document
- the Prospectus including the fund's objective and investment policy.

Other information

The fund may invest more than 35% in securities issued or guaranteed by a member state of the European Economic Area or other countries listed in the fund's Prospectus. This investment may be combined with the use of derivatives in pursuit of the fund's investment objective.

You can buy and sell shares in the fund on any business day. Instructions received before 12 noon will be dealt at that day's price.

Any income from the fund may be paid out to you quarterly.

In addition to the charges set out in the charges section, the fund will incur portfolio transaction costs which are paid from the assets of the fund. These can be higher when investing outside Europe.

Recommendation: This fund may not be appropriate for investors who plan to withdraw their money within 5 years.

Risk and reward profile

■ The above risk and reward indicator is based on historical data and may not be a reliable indication of the future risk profile of this share class. This Share Class is categorised in risk class 3 because its Net Asset Value has shown very low to medium rises and falls in value historically.

- The risk number shown is not guaranteed and may change over time.
- The lowest risk number does not mean risk free.

The main risks that could affect performance are set out below:

■ The value and income from the fund's assets will go down as well as up. This will cause the value of your investment to fall as well as rise. There is no guarantee that the fund will achieve its objective and you may get back less than you originally invested.

■ Investments in bonds are affected by interest rates, inflation and credit ratings. It is possible that bond issuers will not pay interest or return the capital. All of these events can reduce the value of bonds held by the fund.

■ High yield bonds usually carry greater risk that the bond issuers may not be able to pay interest or return the capital.

■ The fund may use derivatives to profit from an expected rise or fall in the value of an asset. Should the asset's value vary in an unexpected way, the fund will incur a loss. The fund's use of derivatives may be extensive and exceed the value of its assets (leverage). This has the effect of magnifying the size of losses and gains, resulting in greater fluctuations in the value of the fund.

■ Investing in emerging markets involves a greater risk of loss due to greater political, tax, economic, foreign exchange, liquidity and regulatory risks, among other factors. There may be difficulties in buying, selling, safekeeping or valuing investments in such countries.

■ The fund is exposed to different currencies. Derivatives are used to minimise, but may not always eliminate, the impact of movements in currency exchange rates.

■ In exceptional circumstances where assets cannot be fairly valued, or have to be sold at a large discount to raise cash, we may temporarily suspend the fund in the best interest of all investors.

■ The fund could lose money if a counterparty with which it does business becomes unwilling or unable to repay money owed to the fund.

■ Operational risks arising from errors in transactions, valuation, accounting, and financial reporting, among other things, may also affect the value of your investments.

Further details of the risks that apply to the fund can be found in the fund's Prospectus at www.mandg.co.uk/literature

INVESTMENT PROCESS

In actively managing the Compartment, the investment manager uses a combination of market and fundamental company analysis to select securities that it believes offer favourable growth prospects at a reasonable price. The investment manager considers ESG factors a core element of its strategy by seeking to invest mainly in economic activities that contribute to an environmental and social objective whilst avoiding activities that adversely affect society or the environment. Voting rights are methodically exercised and there may be engagement with companies to positively influence ESG practices. For further information, please refer to our exclusion framework in the Responsible Investment policy*, SFDR product category Article 9. The portfolio composition is not constrained relative to the benchmark, so the similarity of the Compartment's performance to that of the benchmark may vary.

Intended retail investor

Suitable for investors with all levels of knowledge and/or experience, seeking capital growth and who have a 5 years or more investment horizon. The product does not have any capital guarantee and up to 100% of their capital is at risk. A specific environmental, social and corporate governance strategy (ESG) is followed for this product.

WHAT ARE THE RISKS AND WHAT COULD I GET IN RETURN?

Risk indicator

| | | | | | | |
|---|---|---|---|---|---|---|
| 1 | 2 | 3 | 4 | 5 | 6 | 7 |
|---|---|---|---|---|---|---|

The risk indicator assumes you keep the product for 5 year(s).
The actual risk can vary significantly if you cash in at an early stage and you may get back less.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as 4 out of 7, which is a medium risk class. This rates the potential losses from future performance at a medium level, and poor market conditions could impact our capacity to pay you.

Be aware of currency risk. Your local currency may be different from the currency of the product. You may receive payments in a currency that is not your local currency, so the final return you will get may depend on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.

This product may be exposed to further risks that are not included in the Summary Risk Indicator. Further information can be found in the prospectus.

This product does not include any protection from future market performance so you could lose some or all of your investment.

If Pictet Asset Management (Europe) S.A. are not able to pay you what is owed, you could lose your entire investment.

However, you may benefit from a consumer protection scheme. The indicator shown above does not consider this protection.

Performance Scenarios

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The scenarios shown are illustrations based on results from the past and on certain assumptions.

Recommended holding period: 5 years

Investment = GBP 10,000

Scenarios

| | | IF YOU EXIT AFTER 1 YEAR | IF YOU EXIT AFTER 5 YEARS |
|-----------------------|-------------------------------------|--------------------------|---------------------------|
| Stress scenario | What you might get back after costs | GBP 3,440 | GBP 2,970 |
| | Average return each year % | -65.60% | -21.56% |
| Unfavourable scenario | What you might get back after costs | GBP 8,680 | GBP 8,890 |
| | Average return each year % | -13.20% | -2.33% |
| Moderate scenario | What you might get back after costs | GBP 10,930 | GBP 18,020 |
| | Average return each year % | 9.30% | 12.50% |
| Favourable scenario | What you might get back after costs | GBP 13,760 | GBP 20,520 |
| | Average return each year % | 37.60% | 15.46% |

The stress scenario shows what you might get back in extreme market circumstances, and it does not take into account the situation where we are not able to pay you.

Unfavourable scenario: This type of scenario occurred for an investment between 2021 and 2023.

Moderate scenario: This type of scenario occurred for an investment between 2013 and 2018.

Favourable scenario: This type of scenario occurred for an investment between 2015 and 2020.

WHAT HAPPENS IF PICTET ASSET MANAGEMENT (EUROPE) S.A. IS UNABLE TO PAY OUT?

Pictet Asset Management (Europe) S.A. is a société anonyme and has been appointed as management company of the Fund. The Fund is also a société anonyme and its assets are segregated from those of the Management Company. The Fund has entrusted the Depositary Bank with the safekeeping of the its assets, which are kept separated from the Depositary Bank's assets. A default of Pictet Asset Management (Europe) S.A. will therefore have no impact on the value of your investment in the product.

WHAT ARE THE COSTS?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest and how long you hold the product. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

– In the first year you would get back the amount that you invested (0 % annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario

– GBP 10,000 is invested.

| Scenarios | IF YOU EXIT AFTER 1 YEAR | IF YOU EXIT AFTER 5 YEARS |
|------------------------|--------------------------|---------------------------|
| Total costs | GBP 113 | GBP 922 |
| Annual cost impact (*) | 1.13% | 1.13% |

(*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 13.63% before costs and 12.50% after costs.

We may share part of the costs with the person selling you the product to cover the services they provide to you. They will inform you of the amount.

These figures do not include any distribution fees, however the person selling you the product may charge you and they will inform you of the actual distribution fee.

Composition of costs

The table below shows:

- the impact each year of the different types of costs on the investment return you might get at the end of the recommended holding period;
- the meaning of the different cost categories.
- GBP 10,000 is invested.

| ONE-OFF COSTS UPON ENTRY OR EXIT | | IF YOU EXIT AFTER 1 YEAR |
|---|---|--------------------------|
| Entry costs | Pictet Asset Management (Europe) S.A. do not charge an entry fee, however the person selling you the product may charge you up to a maximum of 5%. | GBP 0 |
| Exit costs | Pictet Asset Management (Europe) S.A. do not charge an exit fee for this product, but the person selling you the product may charge you no more than 1%. | GBP 0 |
| ONGOING COSTS TAKEN EACH YEAR | | |
| Management fees and other administrative or operating costs | 1,09% taken from this Share Class over a year. | GBP 109 |
| Transaction costs | 0.0383% of the value of your investment per year. This is an estimate of the costs incurred when we buy and sell the underlying investments for the product. The actual amount will vary depending on how much we buy and sell. | GBP 4 |
| INCIDENTAL COSTS TAKEN UNDER SPECIFIC CONDITIONS | | |
| Performance fees and/or Carried interests | There is no performance fee for this product. There is no carried interest | - |

HOW LONG SHOULD I HOLD IT AND CAN I TAKE MONEY OUT EARLY?

Recommended holding period: 5 years.

We have selected this Recommended holding period considering the volatility of the asset class.

You can disinvest according to fund prospectus without penalty. Refer to the "What are the costs?" section for the impact of the costs on your investment return when you exit.

HOW CAN I COMPLAIN?

Any complaint regarding the conduct of the persons advising on, or selling, the product can be submitted directly to these persons or their supervisors. Any complaint regarding the product or the conduct of the manufacturer of this product can be addressed in writing to the following address: Pictet Asset Management (Europe) S.A., 15, avenue J.F. Pictet - Water

(the "Compartment") is a compartment of Pictet (the "Fund").

I dy GBP (the "Share Class") - ISIN LU0448836600

The Fund is managed by Pictet Asset Management (Europe) S.A. (the "Management Company"), part of the Pictet group

OBJECTIVES AND INVESTMENT POLICY

Objective

To increase the value of your investment while seeking to achieve a positive environmental and social impact.

Reference Index

MSCI AC World (EUR), an index that does not take into account environmental, social and governance (ESG) factors. Used for risk monitoring, performance objective and performance measurement.

Portfolio Assets

The Compartment mainly invests in equities of companies providing water supply or processing services, water technology or environmental services. The Compartment may invest worldwide, including in emerging markets and Mainland China.

Derivatives And Structured Products

The Compartment may use derivatives to reduce various risks (hedging) and for efficient portfolio management, and may use structured products to gain exposure to portfolio assets.

Compartment Currency

EUR

Investment Process

In actively managing the Compartment, the investment manager uses a combination of market and fundamental company analysis to select securities that it believes offer favourable growth prospects at a reasonable price. The investment manager considers ESG factors a core element of its strategy by seeking to invest mainly in economic activities that contribute to an environmental and social objective whilst avoiding activities that adversely affect society or the environment. Voting rights are methodically exercised and there may be engagement with companies to positively influence ESG practices. For further information, please refer to our exclusion framework in the Responsible Investment policy*, SFDR product category Article 9. The portfolio composition is not constrained relative to the benchmark, so the similarity of the Compartment's performance to that of the benchmark may vary.

Terms to understand

Derivatives Financial instruments whose value is linked to one or more rates, indexes, share prices or other values.

Emerging markets Markets of less economically developed nations, such as some nations in Asia, Africa, Eastern Europe and Latin America.

Equities Securities that represent a share in the business results of a company.

Structured products Securities similar to derivatives, but with defined risk or performance characteristics.

Other characteristics

Designed for investors who understand the risks of this Compartment and plan to invest for 5 year(s) or more. This is a distribution share class, meaning that it intends to pay income to the holder. Orders to buy, switch or redeem shares are ordinarily processed on any day that is a full bank business day in Luxembourg.

RISK AND REWARD PROFILE

The Share Class is assigned to this risk category because of the price variations resulting from its currency and the nature of the Compartment's investments and strategy. The risk category shown is based on historical data and may not be a reliable indication for the future risk profile of the Share Class. It is not a target or a guarantee and may change over time. The lowest category does not mean a risk-free investment. The Compartment offers no capital guarantee or asset protection measures.

The Compartment may be exposed to the following risks which are not adequately captured by the synthetic risk indicator and may negatively impact its value:

- **Financial Derivatives risk:** the leverage resulting from derivatives amplifies losses in certain market conditions.
- **Liquidity risk:** markets with low volumes result in difficulties valuing and/or trading some assets.
- **Counterparty risk:** losses occur when a counterparty does not honour its obligations related to contracts such as over-the-counter derivatives.
- **Investments in emerging markets** are generally more sensitive to risk events, such as changes in the economic, political, fiscal and legal environment, as well as fraud.
- **Investments in Mainland China** may be subject to capital restrictions and trading quotas (e.g. QFII and RQFII regimes). The Compartment may encounter difficulties or delays in enforcing its rights in the event of disputes.
- **Chinese "Stock Connect"** trading programmes may be subject to additional risks related to ownership rights, clearing & settlement, trading quotas and operational issues.
- **Operational risk:** losses resulting from human errors, system failures, incorrect valuation and safekeeping of assets.
- **Sustainability risk:** ESG related risk events or conditions could cause a material negative impact on the value of the investment if they were to occur.

Further information can be found in the prospectus.

CHARGES

The charges you pay are used to cover the costs of running the Compartment, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

The **entry, conversion and exit charges** shown are maximum figures. In some cases you may pay less. You can find this out from your financial adviser or fund distributor.

The **ongoing charges** figure is based on expenses for the period ending on 31 December 2022. This figure may vary from year to year. It excludes performance fees and portfolio transaction costs, except in the case of an entry/exit charge paid by the Compartment when buying or selling units/shares in another collective investment undertaking.

For more information on charges, please refer to the "Fund Expenses" section of the Fund's prospectus available on assetmanagement.pictet

One-off charges deducted before or after you invest

Schroder Global Equity Fund

an Authorised Unit Trust of Schroder Unit Trusts Limited

Class Z Accumulation GBP (GB00BD8RLF51)

This fund is managed by Schroder Unit Trusts Limited, which is a member of the Schroders Group.

Objectives and investment policy

Objectives

The fund aims to provide capital growth in excess of the MSCI World (Net Total Return) Index (after fees have been deducted) over a 3 to 5 year period by investing in equities of companies worldwide.

Investment policy

The fund is actively managed and invests at least 80% of its assets in equities of companies worldwide. The investment manager seeks to identify companies that it believes will deliver future earnings growth above the level expected by the market typically on a 3-5 year horizon (this is referred to as 'a positive growth gap').

The fund may also invest directly or indirectly in other securities (including in other asset classes), countries, regions, industries or currencies, collective investment schemes (including Schroder funds), warrants and money market

instruments, and hold cash.

The fund may use derivatives with the aim of reducing risk or managing the fund more efficiently.

Benchmark

The fund's performance should be assessed against its target benchmark, being to exceed the MSCI World (Net Total Return) Index. The investment manager invests on a discretionary basis and is not limited to investing in accordance with the composition of the benchmark.

Dealing frequency

You may redeem your investment upon demand. This fund deals daily.

Distribution policy

This unit class accumulates income received from the fund's investments, meaning it is kept in the fund and its value is reflected in the price of the unit class.

Risk and reward profile

The risk and reward indicator

The risk category was calculated using historical performance data and may not be a reliable indicator of the fund's future risk profile.

The fund's risk category is not guaranteed to remain fixed and may change over time.

A fund in the lowest category does not mean a risk-free investment.

The fund is in this category because it can take higher risks in search of higher rewards and its price may rise and fall accordingly.

Risk factors

Currency risk: The fund may lose value as a result of movements in foreign exchange rates, otherwise known as currency rates.

Derivatives risk: Derivatives, which are financial instruments deriving their value from an underlying asset, may be used to manage the portfolio efficiently. A derivative may not perform as expected, may create losses greater than the cost of the derivative and may result in losses to the fund.

Liquidity risk: In difficult market conditions, the fund may not be able to sell a security for full value or at all. This could affect performance and could cause the fund to defer or suspend redemptions of its shares, meaning investors may not be able to have immediate access to their holdings.

Operational risk: Operational processes, including those related to the safekeeping of assets, may fail. This may result in losses to the fund.

Performance risk: Investment objectives express an intended result but there is no guarantee that such a result will be achieved. Depending on market conditions and the macro economic environment, investment objectives may become more difficult to achieve.

IBOR risk: The transition of the financial markets away from the use of interbank offered rates (IBORs) to alternative reference interest rates may impact the valuation of certain holdings and disrupt liquidity in certain instruments. This may impact the investment performance of the fund.

Charges

One-off charges taken before or after you invest

Entry charge None

Exit charge None

This is the maximum that might be taken out of your money before it is invested or before the proceeds of your investment are paid out.

Charges taken from the fund over a year

Ongoing charges 0.60%

Charges taken from the fund under certain specific conditions

Performance fee

None

The charges you pay are used to pay the costs of running the fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

The entry and exit charges shown are maximum figures and in some cases you might pay less. You can find out the actual entry and exit charges from your financial advisor.

The ongoing charges figure is based on the last year's expenses for the year ending December 2022 and may vary from year to year. The ongoing charge figure excludes portfolio transaction costs. The charges are mostly, if not exclusively, the Schroders Annual Charge (as may be discounted for retail unit classes depending on the size of the fund) but certain additional expenses may be charged as set out in the prospectus. The Schroders Annual Charge (without any discount) for this unit class of the fund is 0.62%. The fund's annual report for each financial year will include details on the exact charges made including any discounts.

Please see the prospectus for more details about the charges.

Past performance

Past performance is not a guide to future performance and may not be repeated. The value of investments may go down as well as up and you may not get back the amount you originally invested.

The chart shows performance in British pound after the ongoing charges and the portfolio transaction costs have been paid.

The fund was launched on 24/05/1989.

The shareclass was launched on 19/02/2016.

Performance figures are only available since the launch of the respective share class.
